A STATEMENT BY THE REPUBLICAN PARTY OF MOORE COUNTY

There can be no relief from the present burdensome taxation and expenditures until a change is made. The party in power at present has too many debts to pay in the way of recompense to party and not to the people as a whole. County expenses in North Carolina in the past ten years have increased from around thirty million dollars a year to over four hundred million dollars per year. A statement that taxes are being reduced is incorrect. Get your receipts, and compare them with each year past. If times are as hard as some calamity howlers predict, has your County government done anything to help you? We do not pay taxes at Washington. Your relief, if to be received at all, is here at home. Progress if to be made lasting must be made within our means. Progress should be for service and not for show. Excessive taxation destroys revenue entirely, drives out industry, banking and home building and reduces the value of land to a minimum.

The Republican party offers three self made men for County Commissioners, who know the value of a dollar, how to spend it successfully and where it will benefit the people most.

From the upper end of the County, R. B. Reynolds;

From the County seat, O. D. Wallace;

From the Sandhill section, Alton Cameron.

From the standpoint of integrity these men are not excelled. They have made a success of their own personal affairs and one can go a long way to help the people of Moore County.

Every man offered by the Republican party of Moore County is a man in integrity, made a success of his own personal affairs and can render service without show and render representation without favor.

No one of these men are tied to a constituency looking to settlement of personal favors and party compensation.
