THE PILOT, a Paper With Character, Aberdeen, North Carolina

Proves Red Variety of Cotton Can Dr. Symington Warns **Be Grown Profitably in County**

Dunc McCrimmon Gives Figures To Prove Experiment Here a Success

By Bion H. Butler

Readers of The Pilot have noted my references to Dunc McCrimmon's crop ed out to be good, and was favorably of an unusual variety of red cotcotton was watched with more or less satisfactory as a milling staple. interest by farmers because it was of while on a visit down that way where nishes the following detailed statement of results.

ceived a like amount. This cotton was been sold, and it is evident that furused 400 pounds of fertilizer per acre, other sections of the Sandhills. top dressed with 50 pounds of Nitrate of Soda and 50 pounds of Muriate Cedar Hill School Potash, making a total of 500 pounds per acre. The cost of fertilizer used was \$523, landlord's rent \$265, which made cost of \$788, giving profit from Aberdeen Fourth on List for lint of \$222, less cost of seed purchased \$122. This leaves a small profit of only \$100 from sale of lint cotton. I still have on hand unsold, 569 to estimate the worth of unsold prod- ance for second month, 1930-31. ucts on hand. Using the present market price of seed on local market, or from cotton oil mill, these seed would bring around \$200 but being of the variety they are, I would consider them worth for planting purposes nearer \$1,000. Special effort has been made to keep the strain pure, and I

who did the planting and cultivation and harvesting. Mr. McCrimmon says further in his statement about the crop that it was a pleasure and a happy success, and all this in the face of low prices for cotton. The lint turn-

commended by the cotton mill at Vass ton, which he planted on the farv as being of good length, almost an out the Lobelia road from Vass. T's inch in its average, quite uniform, and

The land on which the crop was a type grown from seed brought grown is a familiar tract on the Lofrom Mississippi by Mr. McCrimmon belia road, rather level, free from much washing, clay not very far from his eye was caught by what seemed the surface, a fair type of Sandhill to him a valuable cotton. He planted cotton land, not so good as much land a good crop last spring on land that in the state, yet better than some of had been farmed for many years, land the thinner sandy land in Moore and of the rather better sandy character, Hoke counties. The amount of fertibut not enough better to boast about lizer. used was not large compared very much. Mr. McCrimmon made a with some applications made on careful test of this cotton, and he fur- farms of the section. The cotton is 2 close growing cluster type, which means that the bolls are numerous "We had exactly fifty-five acres of on the limbs, and the limbs are short this red variety, and gathered forty- and the growth permits sun to get to eight bales, or 24,000 pounds of lini the plant and fruit. The boll is above cotton. The farming was done by ten- the average in size, and the crop this ants, who received one-half, or 12,000 year was notably free from weevil. A pounds, while leaser or landlord re- considerable portion of the seed has

sold on our local market for around ther experiment will be tried on a \$2,000, my one-half being \$1,000. We wider scale in 1931 by farmers in

Against Influenza Public Should Be On Alert Fou Symptoms and Act

Promptly

Sporadic cases of influenza are bethe state, says Dr. J. Symington, public health officer. It will be recalled that the terrible epidemic of 1913 came on suddenly, with virulent cases in intensity and virulence as the epidemic spread.

In dealing with this treacherous di sease, and with only the meager knowledge about it that any one possesses at this time, it is well that everyone throughout the state should be on the alert for the appearance of iness, trades, or professions not hereby any attacks of influenza. In connec- taxed at any time. And when any intion with the cases occuring at this crease is made the license shall be retime, a troublesome sore throat seems to be one of the principal symptoms. Sore throat of itself, as every physician knows, is often a treacherous problem to deal with. One form of sore throat alone, technically known as septic sore throat, is often as bad as diphtheria. Septic sore throat can be conveyed through such vehicles as milk and other food. Effects on such organs as the kidneys, especially in small children, are often fatal.

This notice cannot be considered in the form of news to many but it may be regarded as a caution with regard to a matter that in the past has of. ten been of such serious import to all the people.

CHRISTMAS EXERCISES AT CAMERON SCHOOL

Tonight, Friday, the Cameron school will give its Christmas exercises. Each grade will contribute a portion of the program, which will begin at 7:30 p.m.

In connection with the exercises, there will be a community Christmas tree. The general public is invited to bring presents to put on the tree. The mit.

pupils' home-room presents and treats will be distributed Friday afternoon in the respective classrooms.

The patrons and friends of the school are cordially invited to attend this Christmas program. The admis-
