always fresh

Aberdeen, South Street E. B. Maynard, Mgr.

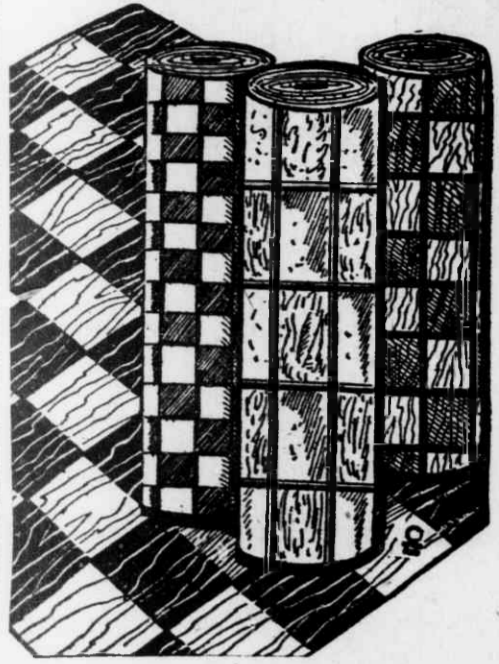

Aberdeen housewives will have an opportunity tomorrow to learn what's the latest thing in the culinary art. A noted home economist will conduct a Free Cooking School here under the auspices of the Carolina Power and Light Company, using a Universal Electric range and demonstrating its convenience and economy and its comfortable operation. The materials to be used in this demonstration have been purchased of local firms and are such as every housewife has available in the mercantile establishments represented in the advertisements on this page.
