MANY FARMERS ATTEND FIELD MEETING

Field meetings held recently in the upper end of the county were well attended. At the wheat demonstration of Oscar Hussy, on the old Plank Road, twenty farmers assembled to study the results to be obtained from the use of Nitrate of Soda used as a top-dresser. At the demonstration of W. A. Caviness, near High Falls, there were twenty-five farmers assembled for the same purpose.

These men, after going over the field and studying the growth and maturity, estimated in most every case that the acres on which the top-dresser was used would make twice as much as where nothing but the fertilizer at planting time had been used. Had there been a cover crop turned under, before this grain was put in, the increase would have been quite a bit more. B. H. Powers and C. L. Brady near High Falls both have fields which will make good yields this year. Indications now are that fields will yield around 25 bushels of wheat per acre. These men had lime and clover on their land in addition to the fertilizer used.

Advanced Refrigeration

Continually working for the advancement of domestic electric refrigeration, engineers of Frigidaire Corporation have made it possible for this General Motors subsidiary this year to present a household refrigerator with many refinements and improvements, according to an announcement by the local representative. Economy, efficiency and beauty have been the guiding stars of these engineers and as a result the Frigidaire of today operates at much lower cost, freezes more ice cubes faster, has an interior and exterior finish of durable white porcelain-on-steel and provides more shelf space than before.

You are cordially invited to view the new model FRIGIDAIRE'S now showing in our warerooms.

FISHERMEN---

Last week we advertised that we had put 7,000 small black bass in our lake and that the lake was full of fish. We said we were going to allow the public to fish for \$1.00 per fisherman and would give a free dinner to anyone who did not catch any fish. We had visitors from Fort Bragg, Pinehurst and as far as Asheville but we did not have to give a single free fish dinner. Everyone caught fish.

If you will notify us a day in advance so we can catch the fish we will furnish you fishing and a dinner for \$1.00.

LAKE DUNLOP

Formerly Sweetheart Lake

East of Highway Between Lakeview and Southern Pines

This is a turn in the right direction when we stop to consider that the county average for Moore county on wheat is only about 10 bushels per acre.

Twelve of these men are now putting on "Race Acres" of corn. These are pretty well scattered over the upper end of the county. In practically every case where this corn is being planted, a cover crop of vetch has been turned under. Two hundred pounds of top-dresser will be used on each of these acres. Results from this work before have been very gratifying and if weather conditions are favorable this year we hope to have some record yields again this fall.

Results of this work will be published after the wheat has been threshed and for the corn after it has been harvested this fall.
