Washington Portraits For All Local Schools

Congressman Lambeth To Send Posters for All Classrooms in Moore County

Announcement is made by Congressman Walter Lambeth of Thomasville that every schoolroom of every school in his district will, within a few weeks after the opening of the new school term, receive a beautiful portrait-poster of George Washington, executed in colors. The portrait to be used in these posters is a reproduction of the famous Gilbert Stuart Athenaeum painting and will be 22 inches in size. This poster was selected after a good deal of study, and is considered the finest example of poster making available. The poster-pictures featuring George Washington are being distributed by Congressman Lambeth in co-operation with the U. S. George Washington Bicentennial Commission of Washington, D. C.

Congressman Lambeth also offered to assist all those organizations and individuals in his district who are planning to participate next year in the nine-months, nation-wide celebration of the two hundredth anniversary of the birth of George Washington. He is in constant touch with the U. S. George Washington Bicentennial Commission and will serve, in the distribution of plans and programs for the coming George Washington Bicentennial celebration which begins on February 22nd and continues until Thanksgiving Day, 1932.

The commission has prepared appropriate material for schools and colleges, for churches, patriotic and fraternal societies. It has material on plays and pageants, historical material on the life of George Washington, outlines for programs, suggestions for local commissions, and other interesting data. Any of this material, Congressman Lambeth explained, is available to his constituents who are interested in any phase of this great undertaking. If they will write to him, he will see to it that such material will reach those desiring it.

Investigate—HUSHED HEAT!

in America's lowest priced quality oil burner

HUSHED HEAT is the result of years of combustion research in Williams laboratories, by the very engineers who pioneered oil heat for the home. It brings almost soundless operation to the acknowledged greater efficiency of the projected-flame type of oil burner.

Retaining all the time-proved Oil-O-Matic features, Williams engineers have created a new burner, embodying HUSHED HEAT. It burns low cost fuel oil—a richer fuel than the costlier light distillates commonly used. This saves you hundreds of dollars on future fuel bills.

Let us examine your heating plant, quote you exact cost figures, and explain the easy Williams Budget Payment Plan.
