## LEASES 20 ACRES ON MIDLAND ROAD FOR NIGHT GOLF

Walter Haines Plans Illuminated Course for Driving, Successful in North

TO ERECT CLUBHOUSE

Walter Haines of Long Island has leased 20 acres of the Barber lands on Midland Road, with a buying option, on which he will at once construct a night golf layout. The location is at the junction of the road leading from the Midland road out toward the Barber lakes, and embraces four of the five-acre lots as the land was originally plotted, on the east side of the Barber road and north of the Midland road. L. L. Biddle, II, negotiated the lease.

The proposition is to clear the ground for tee shots, as the night courses are purely driving schemes. The ground will be lighted up with three batteries of high-powered lamps that will illuminate the entire field. About the field will be small lamps, "snow-ball" lamps they call them, which will show the immediate vicinity of each particular section, and also serve to indicate where the balls go as they are driven out from the tees at the club house. The light device is the airport system, and it will be a novelty in itself for the section. Clubhouse, bath house and other small conveniences of the kind will be built at the start. The future will be determined by the result of the venture.

Night golf is not a competitive game in leading contending parties about the field. On the contrary it is an individual game, each player being given a bucket full of balls. He tees his ball and drives it down the field, watching by the aid of the bright lights where it goes. No caddy runs after it, for the player has no interest in the ball except the one play, and for the next drive he simply tees another ball and drives again, continuing his play until he has emptied his bucket. He follows his ball with his eye, determining his skill in his play by the distance of the drive, its course and nearness to the objective points in the field which tell him how nearly he has landed where he desired, and in the morning the balls are gathered up and brought in, as they have nothing to do with the game after they are driven with the first stroke.

Mr. Haines is operating a similar venture in the North where it has met with a decided popularity. The location is a convenient one to all the Sandhills neighborhood, and with ample field and good surface.

### BRICK AND HALF TIMBERS FOR ENGLISH HOUSE

SELECTING the plan that suits is about as difficult as any part of the home-ownership process. The reliable style of English origin that includes the use of brick and stucco with some half timbers showing is much of a favorite. The general tone of exteriors of this type is brown, but a colorful touch can be introduced by painting windows or doors a gayer color. Floor plans can be with living quarters facing the garden at the rear, and include the desired at-

tached garage under the main roof.

Complete building plans and specifications are available for this cottage for \$1.00. Included with the plans is a cardboard cut-out model of this cottage, architecturally drawn to scale. The model can be colored, and it will visualize for you exactly what the completed cottage will look like. Address your request for plans and model to the editor of this paper.
