Tufts and Wicker Perform Autopsies to Determine Eating Habits of Quail

Birds Like Sorghum, Ragweed, Lespedeza and Wild Plants But Scorn Cowpeas

James Tufts and Rassic Wicker are two enthusiasts in botany and bird supplies, and they are apparently uncovering some information regarding the subsistence of quail which is to be of value to the Sandhills. The increasing interest in bird-hunting and field trials has led to much speculation as to how to provide feed crops for the wild life, with the common result of planting here and there plants which will afford seed for the quail. To make sure what a quail likes to eat these men have been opening the stomachs of birds killed and noting what has been the bill of fare.

For one thing they find that cowpeas are not often seen in the quail's diet. More popular among the things planted for them are sorghum, and a seed called bene. Ragweed is wonderfully popular with quail. But the main items of the bird's dinner bill are found in the wild plants that are more or less abundant over the hills and valleys. Among these are several varieties of lespedeza that are common in the Sandhills. Mr. Tufts and Mr. Wicker have been experimenting with some new varieties of lespedeza, some grown from seed furnished by the government, and while their experiments are not carried far enough along yet to reach conclusions they have found that lespedeza is a plant of many virtues, the native as well as the foreign types. A number of experimental plots are planted through the woods here and there to enable the study of the imported plants under local conditions. Investigation shows some varieties of lespedeza that grow two or three feet high, promise a good supply of seed for birds, but also indicate a possible high value as cattle feed.

To Attract Birds

As the wild birds must depend always more on their native food supplies than on stuff planted throughout the woods one object of the study is to get information that may be given land owners to enable them to help encourage the native plant growth,

4,000 Automobiles

Registration Figures Show Moore Has 3,365 Passenger Cars, 670 Trucks

Moore county had 3,365 passenger cars and 670 trucks on the first of this month, as compared with 3,875 passenger cars and 650 trucks just a year ago, according to the figures compiled in the office of L. S. Harris, director of the Motor Vehicle Bureau. Figures are obtained by measuring the cards in the registration files and estimating the number, by which they might vary probably as much as a dozen.

The registration for the state was 411,215, including 354,696 automobiles and 56,519 trucks, the first of this month, as compared with registration a year ago of 451,740 motor vehicles, including 383,730 automobiles and 58,010 trucks. While the drop in trucks was less than 1,500, the drop in automobiles was nearly 40,000.

The county average for automobiles is about 3,547 and for trucks 565, with less than 12 motorcycles to the county. Only five counties have more than 10,000 automobiles, Guilford with 24,960, Mecklenburg 21,850, Forsyth 18,100, Wake 13,930 and Buncombe 13,850. Mecklenburg leads in trucks, 3,030, Guilford 2,720, Forsyth 2,550, Wake 2,200, Buncombe 2,050.

protect it from fire, and in every way enable the birds to have as bountiful a crop as possible of the seeds they are familiar with. Many of the native wild plants like to establish themselves around the edges of the farms and by the roadsides and creek bottoms. Encouragement there will help to increase bird life in the woods adjoining. As Mr. Tufts and Mr. Wicker develop their experiments in this direction they will make known what they discover, and the people can profit by joining in the work of broadening the feed supply of birds and the increase of birds all over the territory.

Each County To Have Auto License Office

Aberdeen To Serve Sandhills Under Plan of State Motor Vehicle Bureau

With the ultimate aim of having an automobile license plate station in every county in the state, for the convenience of the owners of automobiles, as well as for increased revenues for the State, Director L. S. Harris, of the Motor Vehicle Bureau, is making plans for an increased number of stations for selling plates at the end of the year for 1932.

A dozen permanent stations are to be added to the 16 in operation last year, to remain open during the entire year, and 23 stations, an increase over last year, will be open during the license plate selling period, from December 15 to February 15, Director Harris said.

Permanent stations will be added at Lenoir, North Wilkesboro, High Point, Reidsville, Rockingham, Aberdeen, Fayetteville, Wilson, Greenville, Kinston, Weldon and at Waynesville or Canton, in addition to those which have been in operation and will be continued at Asheville, Statesville, Shelby, Gastonia, Charlotte, Concord, Salisbury, Greensboro, Burlington, Durham, Rocky Mount, Goldsboro, Wilmington, New Bern, Elizabeth City and Winston-Salem.

The Carolina Motor Club operates the stations at all points in the state except at Winston-Salem, where the local motor club handles the plates.

TELEPHONE COMPANY OFFERS ITS STOCK TO SUBSCRIBERS

The Associated Telephone Utilities Company with headquarters at Madison, Wisconsin, the parent company of the local telephone company and other telephone companies in 25 states of the union, are now offering their common stock for sale to its subscribers and the public in general.

Stock is sold for cash or on deferred payment plan at any office of the company. Dividends are paid in common stock at the annual rate of 8 percent of the number of shares owned on the 15th days of January, April, July and October. This stock is being offered at the market price which is the previous day's closing price on the Chicago Stock Exchange.

The stock is fully paid and non-assessable. The owners of the Associated Telephone Utilities Company are the security holders, no one of whom owns a controlling interest. Nearly one-half of the employees of the system are indirect owners of stock of the company through their own organization.

This company has grown from a gross earning of \$405,032 in 1926 to \$17,873,046 year ending June 30th, 1931, from 7 exchanges in 1926 to 909 now, and from 483 stock holders in 1926 to 10,932, August 31st, 1931.

A few of the facts regarding the stock for sale are included in the above. Information in detail may be had at the local offices or from any one of the employees of the company.

NEW BOOKS ON SHELVES OF SOUTHERN PINES LIBRARY

New books at the Southern Pines Library include:
A White Bird Flying, by Bess Streeter Aldrich; Ten Commandments, Warwick Deering; Finch's Fortune, Maza De La Roche; Story of Julian, Susan Ertz; Kindled Flame, Margaret Pedler; All Alongshore, Joseph Lincoln; Sand In My Shoes, Katherine Ball Ripley; The Way of a Man, Joan Sutherland; A Man's Own Country, Katherine Newlin Burt; Red-Headed Woman, Katherine Brush; Belle-Mere, Kathleen Norris; Flower of Thorn, Marie Conway Oemler; Brothers In The West, Robert Reynolds; The Opening of A Door, George Davis; Crime Conductor, Philip McDonald; Ellen Terry and Bernard Shaw, An Intimate Correspondence; Our New Ways of Thinking, George Boas; Road To Culture, G. H. Counts; The Voice Flows To The Caspian Sea, Pilmyak.
Juvenile books include: The Cat Who Went To Heaven, Elizabeth Coatsworth and Sailing The Skies, by Malcolm Ross.

SEPTEMBER WEATHER

A rainfall of only seventy-seven one hundredths of an inch, 2.81 inches less than normal, now leaves the Sandhills with a deficiency of 3.15 inches for the nine months of the year, the only precipitation recorded for the month being sixty-seven one hundredths of an inch on the 3rd, and ten one hundredths of an inch on the 26th.

This long continued dry spell made an otherwise fairly normal month seem unduly hot. As a matter of fact the monthly figures show but little variation from the averages of 84-5

Blinding Headlights Doomed---

Amazing New Invention Makes Night Driving Safe!

Fits Any Headlight

At last! Night driving suddenly becomes safe from glaring headlights! At one sweep, a tiny inexpensive invention banishes glare. Doubles the spread of road illumination. Shoots an entirely new kind of beam that tends to cut through every light on the road. Not an "attachment." Fits any car. Manufactured by a 25-year-old, two million dollar company.

Perfect-O-Lite

goes on sale here next week, for the first time in North Carolina. Try a pair of these amazing bulbs on your car. See what a pleasure they make night driving, how they minimize danger.

It is a well-known fact that motor car manufacturers have solved nearly every big problem except one. As soon as the sun goes down at night, the highways of America break forth into a constant rushing stream of "dimming and damping." Speed is cut down one-third to one-half. Every morning finds newspaper accounts of wrecks and serious injury. Every man who ever groped dizzily down the highway in traffic at night knows the horrible sensation of being half-blinded by cars on his left, unable to see the ditch on his right, his own lights seeming dim and shadowy and practically worthless. Now, in a twinkling, this curse of night driving is lifted like magic and inexpensively from the shoulders of the entire motoring world!

Fits Any Headlight

This new lighting discovery is called Perfect-O-Lite. It is a little invention that replaces the "bulbs" in your automobile headlights. No extra wiring or installation. This new lighting method costs only a tiny fraction as much as so-called "Spot" Lights and "Driving" Lights, yet actually DOES double road illumination. Banishes need for Glare Shields. Cuts through the other fellow's lights, yet absolutely cannot glare in his eyes. Makes ruts, animals, children, detour signs in the road more clearly visible. Actually lights the road so fully that you can drive at high speed and still see your way!
