Solicitor Phillips Scores Auto Drivers

Tells Kiwanis Club Next Legislature Should Act to Curb Reckless Driving on Highways

Don Phillips, solicitor of this district and candidate for judge of the Superior court, in an address Wednesday before the Kiwanis Club called attention to the alarming number of deaths and injuries due to automobile accidents on the highways. He pointed out that the average number of deaths in the United States, due to automobile accidents, is 24,000 per year and injuries 800,000 per year, and that property damage alone amounts to more than two billion dollars. Mr. Phillips said that in North Carolina alone the average death rate is three a day due to automobile accidents. He stressed the importance of the Club demanding of their representatives in North Carolina General Assembly that they see that some sort of legislation is passed to curtail the deaths and injuries resulting from reckless driving.

Mr. Phillips stated that it was impossible for the North Carolina patrol to control, with its small number, the traffic along North Carolina highways. He further pointed out that anyone, although he may be an idiot, can secure a license to drive an automobile in North Carolina, provided he can raise the price of his license plate; and under the present law it is impossible for the courts to reject a man's license unless convicted of reckless driving.

The speaker said that he did not know whether or not it was wise to license the drivers of automobiles but our legislators should formulate some kind of a law to remedy reckless driving of automobiles in this state. He further recommended that each individual of this Club should not hesitate to see that anyone driving a car in a reckless manner is indicted and he serve as a witness when the case is brought before the courts. Mr. Phillips said that unless something is done, innocent persons driving automobiles are likely to be injured seriously due to the recklessness of others.
