**NOVEMBER WEATHER**

For the first time in nine years Thanksgiving Day showered us with rain, 2.85 inches falling, one-half inch above the normal fall for the entire month, making a total for the month of 5.73 inches. This is over 3 1-4 inches above the normal, thus bringing the precipitation for the 11 months of the year to 7.55, inches above the long time normal record. While Thanksgiving Day was moist, it was warm, registering a high of 66, and a low of 61.

A rather unusual rain, thunder and lightning storm on the night of the 10th gave variety to the month, which had 14 days with a temperature of 70 or more, and ranged from 80 on the 8th to 24 on the 13th, and for the whole an average of four-tenths of a degree over the long time normal, and two degrees above 1933.

Long time average	Max.	Min.	Aver.
1933	64.5	41.3	52.8
1934	62.2	40.2	51.2
1934	65.2	41.2	53.2
