MOVIE PRODUCING INDUSTRY TAKES LOOK AT SANDHILLS

Fred E. Pelton, representing the National Association of Motion Picture Producers, was in Southern Pines last week and conferred with representatives of the Chamber of Commerce. Mr. Pelton is looking into North Carolina as a possibility for the motion picture production industry should the industry decide to abandon California due to high taxation. He has visited the leading cities of the state.

The newspapers of North and South Carolina have donated the space for this and a series of advertisements which will appear for the purpose of bringing facts about the Carolinas before their people, that they may be better informed as to the resources, history, and industrial importance of the Carolinas, and that they may know how they can assist in the broad movement to advertise to the world the advantages of this favored section.

To develop our natural resources . . . to expand our markets — to build our recreational and sport areas . . . and thus increase our wealth and reduce our taxes, we must attract new capital and bring a greater number of new people to the Carolinas.

The world is waiting to know about the Carolinas . . . of our historic and scenic points of interest . . . our natural advantages and resources . . . of our all-year favorable climate for travel, for sports, for recreation, as well as for manufacturing enterprises of almost every character.

To inform a waiting world is the purpose of The Carolinas, Inc., through a co-ordinated plan of advertising and promotion of both the Carolinas . . . all of which will increase our portion of the tourist business, now estimated to be worth five billion dollars a year. This tourist business will not only bring about greater local consumption of products, and provide greater local employment, but the travelers themselves become residents, investors, manufacturers, etc.

The **CAROLINAS** INC.

The Carolinas, Inc., is a non-profit organization of Carolina citizens and institutions interested in the sound development of the Carolinas.
