Satisfactory Sign-up Reported by Cotton and Tobacco Growers

County Agent Explains Reason Why Farmers Should Join in New Program

By E. H. Garrison,
County Agent

The blanks for signing up cotton and tobacco growers under the new program arrived last week and we have been going forward with the program. So far, the sign-up has been very satisfactory and I am quite sure that the majority of the folks in the county will sign one of these blanks. Personally I do not see how nor why anyone would not sign this. It does not tie you up as completely as the old program did and, too, if you find at a later date that you can not carry out the terms of the agreement, you will not be obligated to do so. This in the true sense of the word is not a contract but is an application for Soil Conservation payments.

To get the maximum amount of payments, you should stick to the old figures of the 1934 cotton and tobacco contracts. Instead of having anything to plow up or destroy, where the crop planted is larger than the 1934 acreage, this would be charged off your payments. If the amount to be charged against you should be larger than your soil conserving payment, then we would just forget about the whole thing. All this of course refers strictly to the Soil Conservation program. In case the State Compact should go through on tobacco later, then you would be held to the old contract figures. On this Soil Conservation program there will be no tobacco sales cards to buy and no cotton gin certificates to fool with.

Soil Conservation

What was cotton and tobacco rented acreage under the old contract will come in under the heading of the soil conserving acreage. The payments on this acreage, particularly in the case of tobacco, will run about twice the amount of the last year rented acreage. In a good many cases, this will almost pay a fertilizer bill this year. When this can be taken care of in that manner, I think that anyone would be wise in signing up. All the

Busy Readers

High School Library Circulation Greatly Increases Over Year Ago

In the library of Southern Pines High School are approximately 1,500 books, of which 200 have been added during the present school year. The circulation thus far this year has been around 3,577 books, as compared to a total of 2,377 for the entire last year. At the present rate, by the end of the year, the library will have charged but twice as many books as last year, illustrating the fact that reading had increased remarkably. The average daily circulation is 25, which means that every day one out of five students takes out a book. Another way to look at this is that every student takes out one book every five days.

things required under this new program are things which should be done, regardless of the pay. For example, the acreage designated as soil conserving acreage may be planted to peas and peas cut for hay. Either peas, velvet beans, soy beans or lespedeza will count on this soil conserving acreage.

Thirty per cent of the base tobacco acreage and 35 per cent of the cotton base acreage is the most that anyone will be permitted to rent under the program. Twenty per cent of the base of all crops on the farm, such as cotton, tobacco corn, oats, barley, etc., will have to go into a cover crop. The above mentioned crops are classed as soil depleting, while all the legumes are classed as soil conserving or soil building. This depends upon what is done with the crop. If the legume crop is turned under it is soil building. If the crop is cut off it is soil conserving.

If there is any further information which you need on this program I shall be glad to furnish it at any time.

GOVERNMENT COTTON CAN BE RELEASED FOR SALE

Producers who borrowed 12c on cotton through the Commodity Credit Corporation can have this cotton released for sale by paying 1-4c less than the price of 7-8 middling at the time the cotton is applied for, County Agent Garrison announces.

With all interest and storage charges paid up, this will give the producer about 1c per pound more on his cotton if the cotton is of good grade. Mr. Garrison has a supply of the forms and will be glad to assist any one in making application for the cotton.
