Property Owners Must Sow Own Front Yards

Town Authorities Not To Be Imposed Upon by Those Holding Back

Because property owners of Southern Pines have been procrastinating on their grass planting in the expectation that the town authorities would plant their lawns if they didn't the Board of Commissioners is considering abandoning the plan in effect for some time to improve property of absent owners.

"We have done some planting on private property at city expense for beautification purposes, but some property owners are taking advantage of it and expecting us to sow lawns for them," said one member of the board this week. "If these people haven't enough civic pride to try to have their places look as well as their neighbors', let them suffer the advertisement of an ill-kempt lot. We are trying to uphold the reputation of Southern Pines as one of the best planted cities in the south. But there is a limit to all things, and we cannot allow the town to be take advantage of."

THE NEW DEAL

—has built up a huge bureaucracy which has shown no regard for the Constitutional rights and liberties of our citizens.

—has converted the Federal Civil Service into a bare-faced spoils system.

—has used the money of taxpayers of all political parties to build up a propaganda machine to aid its efforts to continue in power.

—has prostituted the administration of the relief of the unfortunate to the ends of partisan politics.

—has spent huge sums upon public works, despite grave doubts as to the desirability or usefulness of the projects.

—has all but destroyed the export market for American agricultural products.

—has opened American markets to import of foodstuffs which properly should be supplied by the American farmer.

—has harassed American business and has entered into competition in almost every possible way with private industry.

—has misused the Federal taxing power in an effort to promote visionary schemes for the redistribution of wealth.

—has imposed taxes heavier than were ever before placed upon the nation in time of peace and by reckless borrowing has saddled huge obligations upon generations yet unborn.

—has led the nation far along the road toward national bankruptcy and has increased the national debt to unprecedented size.

—has manifested its contempt for Constitutional government.

—has sought to make the legislative branch of the government subservient to the will of the executive.

—in the words of Mr. Roosevelt himself, has set up "new instruments of public power," admittedly dangerous in the hands of men who might misuse that power.

In a word, the New Deal has sought to destroy the American system of government composed of three coordinate branches and to upset the dual sovereignty as between state and nation which the Constitution provides.
