## Terracing Unit Great Aid to County Farmers

New Machine Has Terraced 500 Acres of Land, Built 12 Miles of Roads Since Aug. 3

The County Agent, E. H. Garrison, Jr., with a group of interested parties, was successful in securing a terracing unit for this county. This unit was delivered on August 3rd and since then approximately 500 acres of land have been terraced and about 12 miles of farm roads built.

The terracing unit operated on a strictly cash basis at cost. The farmer is to help stake off the terraces and pay \$3.00 per hour for the time the unit is operating on his farm. Under average conditions it will build about 600 feet of terrace per hour. However, this will depend on the condition to be met in each different field. Up to the present time the average cost per acre has been about \$1.75 per acre.

Securing this terracing equipment is one of the outstanding progressive movements for agriculture in this country. Never before have the farmers had an opportunity to have their land terraced so that they would have proper protection from erosion.

The terracing unit operated in the northern section of the county during August and September and will probably cover the southern end during the winter.

## PINEBLUFF

Mrs. Lawton Foushee and small daughter of Sanford and Mrs. Grandland McCaskill of Canada spent the week-end with their parents. Mr. and Mrs. J. R. Lampley.
