ON THE SUBJECT OF SNOW

Editor The Pilot:

Being a confirmed reader of The Passing Years column (and I hope not many more pass before I again see the Sandhills) I read with interest that of April 12. My memory of old events still serves me well and I challenge the 1915 section.

I am sure I left New Haven for Easter vacation on March 30, 1915—left Philadelphia the evening of March 31st, Wednesday. Had a chocolate milk shake at the bar of the old clubhouse Thursday, April 1st and that on the evening of Friday, April 2d it started to snow. It snowed almost all day Saturday the 3d. We were at the Arlington back of the Holly Inn that season and I remember throwing snowballs at the power lines outside to knock the snow off so we wouldn't be cut off. Quite good sport, too. Then Easter Sunday, with many inches on the ground, was spent cutting rings (1915 style) at the Jenks and other cottages.

So—to get to the point—I believe the paragraph should read April 2d and not 9th. Incidentally the North and South was postponed two days on account thereof. Yours—

—DICK WATSON.

THE NEED FOR EDUCATION

Editor, The Pilot:

The Southern Pines Library Association desires very much to double its local membership this year.

Your report last week of the 1940 census, in effect, emphasizes for us two points. First, the present local patronage of the Library is a gratifying high percentage of the community. Second, the major objective of the Library as an all-the-year-round institution for the service of local residents merits and will amply reward a marked increase in local support. The value of a Library is in the use made of it.

The North Carolina Library Commission "News Notes" for this month contains two pertinent items. The first might be called "A War Note" from Premier Angus L. Macdonald to the Nova Scotia Legislature.

"I believe that in Nova Scotia we must sharpen our brains to the keenest possible point if we are to get along in the economic race. If some higher standard of education among our people can be produced by the institution of regional libraries at a cost within our means every member of this House should support the move. After this war . . . great social and economic problems will arise which can only be properly solved by our people if they have the advantage of an education in school or of the education a man digs out for himself."

The second is good medicine for a Presidential Election year. From J. W. Studebaker, United States Commissioner of Education "This, in my opinion, is the time to redouble our efforts to make our education system operate more effectively than ever in the process of enlightening our judgments. To be specific, we need to buttress our library system, particularly in the rural areas. When people are burning books in other parts of the world, we ought to be distributing them with greater vigor, for books are among our best allies in the fight to make democracy work."

THE SPIRIT OF RELIGION

Editor, The Pilot:

Would it not be well to put the enclosed statement of President Roosevelt in The Pilot?

"No greater thing could come to our land today than a revival of the spirit of religion—a revival that would sweep through the homes of the nation and stir the hearts of men and women of all faiths to a reassertion of their belief in God and their dedication to His will for themselves and for their world. I doubt if there is any problem, social, political, or economic, that would not melt away before the fires of such a spiritual awakening."
