THE NEWS THAT'S TOO BIG FOR THE BILLBOARDS!

This month—on billboards throughout this territory—the Gulf poster below is on display. Because the news it tells is important to all motorists, we have taken this opportunity to give you the full facts.

ONE GLANCE AT THIS POSTER has probably told you that both Good Gulf and Gulf No-Nox gasolines have been stepped up. But what the billboard couldn't explain is that this is not a symbolic picture but an accurately drawn graph!

This chart shows you the relative boosts in anti-knock value—shows by direct comparison, how much these two great fuels have been improved. What's more, these improvements are tangible... step ups that can make a real difference in your car!

The step-up in Good Gulf gives it an extra performance "Plus" ... boosts it so high it now exceeds North Carolina's specifications for premium gasoline. The improvement in Gulf No-Nox—which was already knockproof under all normal driving conditions—makes it tower over its old remarkable high. And when you consider even the old Gulf No-Nox surpassed North Carolina's specifications for premium fuel, just imagine what this new, power-packed fuel will do for your car!
