Young Woman Found Guilty of Prostitution Gets Six Months in Home—or in Prison

Only five cases were tried in Recorder's Court Monday, the lightest docket in several weeks.

Virginia Rose Frost, alias Virginia Smith, 22, of Charlotte was found guilty of engaging in prostitution. She was given six months in the North Carolina Home for the Feeble Minded at Kinston, provided she can be admitted. If for any reason she cannot be taken there, she is to go to the Moore County jail for six months to be transferred to the State Prison in Raleigh as provided by law. The Court was of the opinion that the defendant needed mental treatment.

Caesar Addison, Southern Pines Negro, was sentenced to serve six months in jail for assaulting Carrie Burno in her own home with a shot gun. According to the prosecuting witness' statement, Addison pointed the gun at her and threatened to "blow her brains out."

Worthy Oldham of Sanford was fined \$25 and costs for careless and reckless driving and given a 60-day suspended sentence.

E. G. Wall of route 2 Carthage for assaulting S. V. Marsh by striking him with his fist, was fined \$25 and costs and given a 60-day suspended sentence.

Odell Brooks, Carthage Negro, pleaded guilty of carrying a concealed weapon and was given 30 days on the roads, suspended upon payment of a fine of \$50 and the costs. The Sheriff was ordered to destroy the pistol.

W. R. Clegg, Jr., of Carthage, in a jury trial, was found not guilty of driving a motor vehicle while intoxicated.

Two cases, a drunken driving case against Jim F. Thomas of Carthage and an assault and battery case against Maude Barrett, were continued to next Monday.

## DRAKE ADVISES ON DIPHTHERIA

Health Officer Declares No Need for Cases of Disease in County

Three cases of diphtheria have been reported to the Moore County Health Department during the past two weeks, according to Dr. B. M. Drake, director. This brings the total for the year up to 6.

"Diphtheria is one of the few diseases that can be absolutely eradicated, and it should be looked upon as a disgrace when the disease occurs," Dr. Drake said.

"It has been proven that diphtheria decreases as the number of children under 6 years of age immunized increases," he continued. "Until a large proportion of these children are protected against this disease, it will continue to occur."

"Before toxoid and antitoxin were perfected, diphtheria occurred in epidemics and was largely fatal to its victims. Today we need to awake to the realization that diphtheria is still a menace and that our children will not be safe until they receive at least two injections of toxoid."

The 1937 General Assembly passed a law requiring all children to be protected against diphtheria at the age of 6 months. However, there has been an increase in this county because parents have been unwilling to protect their children against this disease.

"It is a shame," Dr. Drake concluded "that we are not awake to this danger to our children, especially when it can be so easily avoided!"
