

Plan Your VICTORY GARDEN

Without Waste!

See Your Farm Agent Or His Representative For Help in Planning and Caring for your Victory Garden

SEE your dealer for Victory Garden seed packages, for the right gardening tools, and for proper fertilizer.

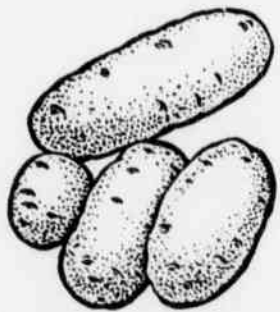

Throughout Moore County this week, on the farms, in the schools, and in the towns, "Victory Gardens" will be the watchword. By helping to conserve foods for our armed forces, we are helping to win this war. By growing proper and nourishing foods in our gardens, we are building the strength of our nation.

An improperly tended garden is greater waste than no garden at all. Make sure your victory garden effort is victorious by planting it in the proper manner and with proper seed and fertilizer.

In each community in Moore County, there are vocational agricultural teachers, home economics instructors, and farm committees who are prepared to advise others in the proper planting and care of gardens. Consult them for help.

The following dealers in seed, fertilizer, and implements are also prepared to help you select the best of seed, fertilizers, and tools for your garden. See them for their help.

Your VICTORY GARDEN PROGRAM will not be complete without growing-out as many of McNeill's quality chicks as you can handle.
