OBITUARIES

MRS. MARY A. COCKMAN
Mrs. Mary Alice Cockman, 82, of Robbins died Friday morning after an extended illness.

Funeral services were held at the Asbury Baptist church, four miles south of Seagrove, Sunday at 2 p. m. Burial was in the church cemetery.

Survivors include one daughter, Mrs. J. C. Wallace of Asheville and one son, George C. Cockman of Robbins, Route 1.

MRS. SALLIE A. CURRIE
Mrs. Sallie A. Currie, 78, of Carthage died in Moore County hospital Sunday morning after a long illness.

Surviving are four sisters, Ella McLean of the home, Mrs. C. M. Hobbs of Raleigh, Mrs. W. F. Bower of Greensboro, Mrs. Catherine Ayers of Oak City; one brother, M. J. McLean of the home.

Funeral services were held at 12 noon Monday at Union church, conducted by the Rev. C. K. Taffe. Burial followed in the church cemetery.

WILLIAM S. COURSEY, SR.
News has been received here of the death on January 24 of William Edward Coursey, Sr., 74, a former resident of Southern Pines.

Mr. Coursey and his family lived here for a number of years in the 1920's and early 1930's and were active in the Baptist church and in civic and club affairs. A son, Jack Barrow Coursey, who died in 1942, was married to a Southern Pines girl, Miss Margaret Silver.

Mr. Coursey's death occurred at LaGrange, Ga., where funeral services were held January 25, followed by burial in a LaGrange cemetery.

He was born at Aiken, S. C., and for many years was a bank examiner and certified public accountant. During the war the family lived at Fayetteville, and he was manager of the Officers club at Fort Bragg and then head of the cost accounting section of the post engineers.

Surviving are his wife, Mrs. Grace Barrow Coursey; one son, William S. Coursey, Jr., and three grandchildren.

MRS. C. L. JACKSON
Mrs. C. L. Jackson, of Pinebluff, died Saturday, January 31, at the home of a daughter, Mrs. E. H. Foster, of New Hope, Pa., after a short illness.

A native of Indiana, where she was born near Indianapolis April 25, 1866, Mrs. Jackson married a minister who some years ago served Baptist churches of Pinebluff, Aberdeen and Carthage and Wadesboro. She was active in church and community affairs.

Funeral services were held Wednesday, February 4, at the First Baptist church in Wadesboro, with burial in the Wadesboro cemetery.

Surviving are three daughters, Mrs. A. E. Beling of Zephyr Hill, Fla., Mrs. Ted Olmsted of West Hartford, Conn., and Mrs. E. H. Foster of New Hope, Pa.; one son, Rev. Paul G. Jackson of Providence, R. I.; 10 grandchildren and two great grandchildren; also one adopted daughter, Mrs. Eugene Dagger of Decatur, Ala., and one adopted son, Brady Brooks of Gadsden, Ala.

The Buffalo (NY) Courier-Express Travel Bureau has been reopened and requests resort booklets.

**Engineering Research Dep't. At State
Studies, Develops Natural Resources**

By **DR. J. H. LAMPLE**
Dean of Engineering School

Research today is an essential part of any engineering college program.

We have been convinced as a nation through our experiences of the past World War II that future progress and, perhaps our salvation in the tremendous economic problems of the world, will be had only through industrial and scientific leadership on our part. Our young men must be prepared to qualify for this leadership through the full development of a modern scientific and engineering college training and research program.

The engineering school at North Carolina State college is now operating such a program, and as a result it has moved to the forefront in college engineering education. It is looking ahead to tomorrow to help provide properly trained college personnel who will have a broad general education covering our economic and social problems, the basic and fundamental principles of their field of engineering, and an indoctrination and training based on a common-sense approach of how, where, and when, as well as highly theoretical concepts, the "know-how" of attacking an unknown problem and resolving the various factors present and finally arriving at an answer which produces an economic solution is best accomplished through actual experience.

Students Participate
Through the leadership of Dr. Wm. G. Van Note, director of the engineering research department, our engineering college program at Raleigh is providing opportunities for our students to become acquainted and actually work on important research problems of North Carolina and the southeastern region.

The environment of inquisitiveness, the influence of highly skilled and experienced research workers, and the actual work experience provided for our students are important and essential factors that can only be provided to an engineering college curricula by an integrated research program on the campus.

The school of engineering here at Raleigh is proud of the fact that it does have through its engineering research department this progressive program of research and experimental activities integrated with the undergraduate and graduate activities.

Development of Resources
Particular attention is called to another important function and developing service which the engineering research department is carrying out. This second functional activity deals with the experimental developments of the natural resources of North Carolina for industrial use and the undertaking of research, projects for the industries of our state.

In many instances industries of North Carolina do not produce finished products. Materials might be mined from the earth or our raw products might be carried on through the first one or two steps in a complicated process of producing a consumer product.

Our engineering research department is cooperating with the industries of the state in the hope of developing new and efficient methods whereby consumer products will be produced entirely by North Carolinians.

Aid to Industry
Our engineering research department is also actively engaged in the research activities in developing new processes and products which are as thoroughly needed in industry, road building, and home construction, etc.

For example, one of our research projects which is most active and is showing signs of reaching a successful conclusion in the not too distant future is the development of a new type of cement which can be made from materials which are found in North Carolina in great supply.

Through engineering research the engineering school of North Carolina State college is also participating in fundamental and scientific investigational programs. Some of these projects are a part of an overall development program which is coordinated and sponsored by agencies of the Federal government. Other projects are supported and carried out in cooperation with private industries.

College Program
To briefly summarize—we believe in and are carrying out as part of our over-all North Carolina State College Engineering School program: first, a research activity which is integrated with every constructional and degree-granting department on our campus; second, a program of development work of the state's natural resources, and the handling of special research projects for the State's industries; and

PINEBLUFF

Mr. and Mrs. Benny Jones of Dalton, N. Y., and Mr. and Mrs. R. G. Burgess of Perry, N. Y., visited Mrs. M. W. Miller last week enroute to Florida.

Weekend guests in the home of Mr. and Mrs. R. G. McCaskill were Mr. and Mrs. L. L. Foushee and children of Durham, and Mr. and Mrs. Everett Ussery and children of Fayetteville.

Friends of Joe Adams will be glad to learn he is doing fine after an operation at the Carolina Medical Center.

Mr. and Mrs. LaDette E. Boyd and daughter Eleanor, of New York, are visiting their aunt Mrs. M. W. Miller. They expect to make their home in this vicinity.

Mrs. M. F. Butler was called to Sliom last week on account of the illness of her mother.

Birth
Mr. and Mrs. Preston Brooks are the proud parents of a son, Paul Preston, born Thursday, February 5, at the Carolina Medical Center. The Brooks have two daughters.

Mrs. Allison of New York state is visiting Mrs. Hazel Allison.

Mrs. Eugene Duger, and Brady Brooks, of Decatur, Ala., visited their mother, Mrs. Catherine Brooks, last week. They were here to attend the funeral of Mrs. C. L. Jackson at Wadesboro last Thursday.

EISENHOWER SAID
"If world opinion were organized for peace, there would never be another war."

third, we are participating and making contributions, scientific and applied, to problems of tomorrow that are facing both the federal government and private industry.

I am confident that our engineering research department, its members and associates, are making an unexcelled contribution to our engineering training program here at North Carolina State college. Their contribution to science and industry is a matter of record—an outstanding record in the southeast.

We are moving in the right direction in the south. If we in the engineering college continue to have vision and courage in our programs of training and research, then we will truly be making a pathway for our industrial development and be leading the south to its rightful place in the economic life of the nation.
