

Local Unit of Alcoholics Anonymous Sets Open Meeting Friday, October 22

Public Invited To Attend Gathering At The Civic Club

An open meeting of the Southern Pines unit of Alcoholics Anonymous will be held at the Civic Club Friday night of next week, October 22, at 8 p. m. The public is invited.

Speakers will be members of AA groups from several cities and towns in North Carolina, alcoholics who will testify what AA means to them and what the organization has done to help them attain and maintain sobriety.

The speakers will, says the announcement of the meeting, "from different walks of life, proving once again that alcoholism, as an illness, is not choosy where it strikes."

Alcoholics Anonymous is described in the announcement as "just what it says it is—a fellowship of men and women who are banded together for one purpose: to combat a drinking problem." The only requirement for membership, it is stated, is a sincere desire to do something about such a problem.

The Southern Pines AA group meets twice a week—a closed meeting each Monday night and an open meeting on Friday night when friends of members and those people who are interested in AA are invited to attend.

Any person who has an alcoholic problem, either personally or with some member of the family or anyone knowing some one with an alcoholic problem who would like to have help are invited to address inquiries to Alcoholics Anonymous at P. O. Box 917, Southern Pines. All replies will be treated confidentially and each inquiry will be welcome, it was pointed out.

Leaf Estimate Down, But Over '53 Production

Based primarily upon recent reports from farmers and upon warehouse sales data, the N. C. Crop Reporting Service set its October 1 estimate of the 1954 flue-cured tobacco crop at 915,750,000 pounds—about 8 million pounds less than a month earlier. The decline in expected production took place wholly in Border Belt areas. The State's total flue-cured crop as now forecast is about 10 percent larger than the 832,305,000 pounds harvested last year and is about 13 percent heavier than the 1943-52 average.

By the end of September tobacco harvest was practically completed in all areas of the State and growers were busy grading and marketing the flue-cured crop. About a fourth of the Type 11 crop had been sold by this time, while close to three-fifths of Type 12 and nine-tenths of Type 13 had reached the markets.

Expected production from the State's Burley crop at 20,520,000 pounds was unchanged from a month earlier. A yield of 1,900 pounds per acre is in view for the 1954 crop which is the highest ever recorded.

BAZAAR, SUPPER

A benefit bazaar and turkey supper will be given at the Pinebluff Methodist Church Wednesday, October 20, it was announced this week. The bazaar will begin at 4 p. m. and run until 8 p. m. Serving of the supper will start at 5:30 p. m. and extend to 8.
