TRUCK BUYERS CAUTION!

THIS YEAR marks a revolution in truck engine design. Ultra-modern short-stroke design has jolted the entire industry. **BUT you can't get it in all trucks!**

The most important truck power advancement of modern times is short-stroke design. The shorter stroke cuts internal friction. Piston ring life is prolonged up to 53%. Gas savings up to one gallon in seven!

LOOK UNDER THE HOOD!

Be alert—check engine specifications before you buy a new truck. It isn't a short-stroke engine unless it has a stroke as short as, or shorter than the bore.

ONLY FORD gives you a modern Short Stroke engine in every truck!

Ford pioneered Short Stroke truck engines over three years ago. Ford has four Short Stroke V-8's and the shortest stroke Six in the business! Why settle for an old-type long-stroke engine? For immediate benefits, for highest trade-in value later—go modern, go Short Stroke, go FORD!
