### Rotarians Hear First-Hand Story On A-Bomb Tests

Mrs. Margaret Cann Schartle, civilian administrator of the Air Defense Filter Center of Miami, Fla., gave members of the Southern Pines Rotary Club a first-hand report on the atomic bomb tests the government recently held at Yucca Flats, Nevada.

"It was a terrible thing," she said. "The heat wave that we had been warned of was just as if you had opened the door to your oven after baking all day and stuck your head near it."

Mrs. Schartle had been invited to witness the tests by the Air Force because of her tremendous interest in civilian defense. She is the first and only woman from Florida to witness an A-bomb test. Last year the Air Force awarded her their distinguished Achievement Award.

Speaking of civilian defense, Mrs. Schartle said it was "extremely difficult" to educate the public to the needs of civilian defense because, she pointed out, observing was a "thankless task."

Now head of a center in South Florida that has more than 500 volunteers on constant duty as part of Operation Skywatch, Mrs. Schartle cautioned her listeners to be lulled into a false sense of security. She observed that, in spite of the general belief that a Soviet attack would be from the region over the Arctic, the likelihood of an attack over the South was becoming increasingly more talked about every day.

Mrs. Schartle's husband, Lt. Col. Schartle is now on temporary duty at Fort Bragg.

Guests at the meeting included Col. Billy F. Ogletree, Col. Paul Monson and Major Bill Crane, all of the Air-Ground School, and Bill Darden of Goldsboro.

### Dove Season Set To Begin Sept. 10

Open season for doves will be divided into two dates this year, with the first to begin September 10, it has been announced by the State Wildlife Commission.

Ray Overcash, Moore County Wildlife protector, said the first of the two dates would close October 6. Another period will begin December 14 and close January 10.

Daily bag limit has been established at eight doves per person, with a possession limit of eight per person.

Shooting hours begin at noon on the days in the period and end at sunset.

Overcash today listed the places in the county that hunters may obtain permits: Aberdeen Hardware, Aberdeen; Tate's Hardware, Southern Pines; Brewer's Esso Station, Lakeview; McNeill's Grocery, Vass; L. B. McKeithen's store, Cameron; Moore Hardware Company, Carthage; Thaggard's Lake (caretaker); Ritter's Hardware, Robbins; Comer Brothers store, Eagle Springs; Johnson's Hardware, West End; M. M. Poole's garage, Jackson Springs; and the general office of Pinehurst, Inc., at Pinehurst.

The licenses are the same price they have been for a number of years: \$3.10 for state hunting or state fishing license; \$4.10 for a combination state hunting and fishing license; \$1.10 for county hunting license; and \$1.10 for county fishing license.

The 1956 sweet potato crop is estimated at about 7 per cent less than the 4,364,000 bushels produced in 1955.

### Tobacco Outlook For Year Remains Good, Allen Says

Moore County tobacco growers, who had one of the most successful crops last year in history, may expect another good one this year, according to Fleet Allen, county agent.

Allen predicted that poundage for this year's crop would equal that of last year, and said that quality of the leaf is exceptional. Moore farmers were somewhat hurt last year with a large percentage of the crop classed "LL," which indicates pale, sick and lower aroma leaf.

Rains in July were a tremendous help in turning the year into a good one, Allen said.

Many growers have indicated to Allen their satisfaction with the crop so far. Many of them have cut part of the crop already but, generally speaking, the crop will be about two weeks late.

Allen also said the corn crop, hardhit by the early summer dry spell, is beginning to show evidence of being a good crop. Allen reported the crop would not be as good as in previous years but would, nevertheless, produce a good yield.

The early dry weather has done no appreciable damage to cotton crops, Allen reported. Actually, he pointed out, cotton crops should be exceptional this year.

### X-Ray your town's health!

A healthier community works better, plays harder, and grows faster. New industry looks for adequate health facilities, too, when it seeks a new site.

Over thirty communities in the Finer Carolina program elected to improve their health facilities. One Finer Carolina town built a medical clinic and established an all time high in vaccinations in that area. Another community financed a doctor's visit from California which resulted in the physician setting up his practice in that community.

From health projects such as these come hospitals, clinics, healthmobiles, nursing services, first aid stations, mosquito and pest control, and adequate sanitary laws.

X-Ray your town and see if your Finer Carolina Committee is doing what should be done healthwise. Help make your town a better and healthier place to live.
