New equipment has been bought this year as further steps in modernizing the town's servites. A new street sweeper and a sewer main cleaner were purchased. The street sweeper will, according to the Council, clean each street in town at least once a week.

Industrial Development

The Council took the initiative in starting the business development' committee that has since grown to include representatives from each section of the county. A booklet, drawn up by members of the committee, has been prepared and is now in the printing stage. Council, in conjunction with the Chamber of Commerce, businessmen and others, has expresed a vital interest in securing industry for the area. At least six groups of interested industrialists, most remaining of a confidential nature, have been shown the area by members of the Council and the business development committee.

Charter

For the first time in the town's history, a new charter has been drawn, modernizing the governmental procedures and making So thern Pines a "city" rather than a town.

Curb and Guffer

Close to 8,000 feet of curb and gutter was built during 1956. Applications are on hand for many more feet. Natural Gas

During the year two competing companies sought authority to serve Southern Pines with natural gas. A number of discussions and meetings with representatives of the companies brought forth a "wait and see" attitude an the part of the Council. Fire Department

This was the second year of extended fire service coverage between the town and suburban areas. Golf Crest was added under those areas with 100 per cent coverage and efforts were being made to get other areas to do the same. The fire department added no new equipment but answered dozens of calls. Education

The town's interest in education resulted in a tremendous effort to persuade Presbyterians to locate a new four-year college
