State Board Grants County's Petition On School District Line

The State Board of Education, meeting in Raleigh, decided this afternoon that about 200 acres of the Southern Pines School District should be transferred to the county school system, to be used, in part, as site for the county's big "Area III" consolidated High School.

Following is the official description of the action as placed on the minutes of the Board:

"The State Board of Education approved the changes in the Moore County and Southern Pines Administrative Units' boundaries by transferring property from the Southern Pines to

the Moore County Administrative Unit in accordance with the description and map contained as a part of the Resolution adopted by the Moore County Board of Education on March 31, 1965. Provided that the property transferred shall not be relieved of its proportionate share of the taxes to be levied to pay the bonded indebtedness of the Southern Pines Administrative Unit."

School officials speaking for and against the change, which had been formally petitioned by the county school board, appeared this morning in Raleigh before the State Board of Education's Finance Committee. Jere McKeithen of Aberdeen, county board of education chairman, County Supt. Robert E. Lee and others, asked that the tract in the Southern Pines district be added to the county unit; while local School Board Chairman Dr. C. C. McLean, Supt. J. F. Jenkins and Attorney R. F. Hoke Pollock appeared to oppose the proposal. Mrs. Walter Harper of the local school board was also a member of the delegation.

The State Board of Education has the authority to order a change of school district lines, when formally petitioned as it was by the county school system. The Southern Pines Board of Education had not granted the county system's request to change the district lines.

The site in question is located largely northeast of Highway 15-501, toward Pinehurst from the Morganton Road intersection, though a small portion of it lies on the other side of 15-501, to make it contiguous with the Aberdeen School District for a short distance.

The land is owned by State Sen. Voit Gilmore, who has said he would donate a portion of it for school purposes, and Pinehurst, Inc. Other owners might possibly be involved, according to what portion of the site was chosen for the school.

It is expected that if the site is used, only about 100 acres of it would actually be acquired for school purposes, although—not (Continued on Page 8)
