SOUTHERN IMMIGRATION.

Intelligent Settlers Wanted. One of the important subjects of a material, as well as social bearing now agitated in the South is the systematic en couragement of immigration. Several months ago met at Montgomery, Ala., and organized a Southern Immigration Bureau, the operations of which are expected to be of great benefit in promoting the bringing in of new and good citizens and additional capital and enterprise. A Southern journal speaking on the subject in a recent issue says: "The section in our judgment needs something more, something with official backing of the State behind it and more permanent than voluntary private association. There ought to be arranged a perpetual immigration con-The strike of Cuban cig-r-makers in of the Appalachian range and south of New York City has ended in a victory the Ohio. The results financially also show an improvement over precedleg years, several roads having declared dividends ranging from 2 to 10 per cent, notably the Saboard and Roanoke;

folk and Western.

The Court Reconsidered. Texas in 1847 had no jails, and had just cut loose from Mexico, and there were but three modes of punishment, small whipping, large whipping and branding for minor crimes. For murder, horse stealing and forgery-death. I was a soldier in General Houston's army and recall one instance of horse stealing, where the guilty party was permitted to escape. It was in Montgomery County in 1857. The man was tried, found guilty, put upon the horse he had stolen, his legs tied under the horse and he was led out to the edge of the timber by some twenty or more of the members of the "court," all mounted and armed Arriving at the end of the timbers, all di-mounted, except the prisoner, and setting their ri es against the side of a log, commenced looking around for a suitable gallows tree. One of the party discove ed, some :00 yards out in the prairie, such a tree with a large limb growing at right angles to the trunk, some twenty feet from the ground. He remarked that the Lord had planted it there to hang our horse thief on. Agreed, and' the whole party walked, have been of inestimable value in their trol is not yet in operation. Its commercial value is undombred, a a big Novo, and will control the market. firm has already so d a single mantelpiece of the agate for \$1 U . Mr Conper will return to Mexico shortly, and while there will make close sear h for amber, which he believes to be deposit. ed in large quantities in the venty of

his agute mine. - N to Y rk G applied 2

1. A Mysterious Iron-Clad Room, In addition to the other Improvements which are being made by the Chine e in their section of the city is one particularly to be noticed on the southeast corner of Wa-hing on street and Waverly place. This building is constructed of brick and from and from its e ter or appearance adds much to the dignity of Chinese a rue tures. But this is not all one nom, the entry to which is on Waverly place, the walls are fixed with oneeighth inch sheet non. The street door is also covered with the same material, which is botel and riveted through three inch blocks, the whole making a formidable harr cade against the entry of no business with the occupants. In addition to all this the vesticule on both sides, as also that | ort on over the entrace, is fined and bo ted with the same substantial metal. The interior of the room is fitted up with concealed trap neatly finished and concented openings in one of the walls about large enough to permit a man to pass though. To what purpose this building is to be devoted is not made public. - San France

An Ancient Tattoned Stave. A notable old African woman, Diana Middleton, ded in Tennesses late w was kidnapped and brought he e before many years as the oldest person in the world. Her face and ha da were heav, v been a cann bal in her native country. and some of her acqualutables remember stories of her capullatistic feets that made her name a terror to childhood. -

How Mummies Are Made. It may be nicresting to some to know how mumm es and made. The process of embaining to as follows, and is called the "isrupelli | rosess ' The eventatory system is cleaned by wash ng with soul Breserved and resists decay. - Uhways
