The town and community people are assured that they will not see a better show of the operetta class even though they go to the opera houses in the larger cities.

Although "Miss Cherry Blossom" was not advertised for the first appearance the attendance was fine, making a big success financially, and bringing out the largest audience which has yet assembled in the new auditorium.

20,000 Miles for a Pound of Honey

A honey-bee journeys 20,000 miles (reckoning the outward and inward trip as one) to gather a pound of honey.

If we assume that the average trip out and home measures half a mile (a low estimate), the immense distance of 20,000 miles, says The Progressive Grocer, must be covered in gathering the raw material for a pound of honey. This is equal to 1-250 miles per ounce.
