

WHAT DOES IT NEED?

What does the world need? Thousands of preachers, standing on the shore of time and peering eternally with the strong authority that their vocation gives them to answer the question. There are a few answers made on pulpits last Sunday: Reverend Henry Howard: Bible is now on the shelf, not in family prayers. Not enough in schools—time proves it.

Reverend C. Everett Wagner, Methodist Episcopal: Too much preaching of Hell fire. Too much parading of wickedness instead of talking about goodness. Too much tempting listeners by describing in detail the things that the wicked do.

Rev. Dr. Sookman: Too much shifting about from place to place. Too much roaming. The people becoming nomadic can't settle down.

Rev. Dr. S. E. Young, says voters neglect their duty. They could make this Republic anything that they chose to make it if they would take the trouble to do it. Perhaps that is seldom truth.

Rev. John Roach Straton, who would willingly help lynch our modernists if his conscience would permit, says we need more revivification. That's proved by the fact that there were ten thousand murders and only a few hangings and executions in this country last year. We saw two holdups in Chicago in one short visit.

Rev. Paul C. Warren: We need modern prophets to interpret the old truths in the pew and in the pulpit. More purity of heart and strength of conviction will bring the millennium.

But the Rev. Charles Francis Potter, prominent Unitarian, says we need a brand new religion, and he proves his sincerity by resigning from his job. It is very enlightening to read twenty or thirty sermons a week.

You would like a pet bison. You can get one from the Government. Too many of the big animals at Yellowstone Park, so 100 of them are offered free to citizens. You will pay the cost of catching and tending.

The Government has proved that the "dying bison" can be brought back to life. Perhaps the Government will do as much for the dying and vanishing forests, cutting more important than the picnic bison.

Miss Fay Lamphier, young California girl, who "easily and naturally" won the beauty crown of "Miss America" says, "Marriage will interfere with my career." Course not. The real business of human beings on this earth is to make it a little better while they live here, and hand on what ability they have to future generations, they also may work.

The good qualities, as heredity factors, are handed on by women. Can the woman whose programme does not include marriage can't possibly have a complete career, no matter what the feminists may say. In a chain, the link that breaks is not the successful link.

It has been suggested here occasionally, during the past ten years, that architects should have their minds on landing roofs for flying machines. Now Chicago, about to build a \$15,000,000 post office, will ask Congress to approve a building, two city blocks long with a landing roof for the flying mail. That would cut an hour off the mail flight from Chicago to New York.

Not far in the future will come

School Frock

Every mother is interested in stylish and serviceable fall school frock for her daughter. This Nad frock combines simplicity of line with richness of effect. It is made of tweed and mirrolean.

The new city, one building devoted to one single business, with a landing roof for buyers and sellers, and employees flying to work in the morning and flying back at night. The great "congested traffic problem" may be solved from the roof before it is solved in the streets. However, don't let that discourage you about good real estate.

About Your Health Things You Should Know

by John Joseph Gaines, M. D.

Danger in Cold, But—
Cold is one of the most powerful agencies opposed to free circulation of the blood. Immerse the hands in ice-water, blanching stiffening and pain will result. Free circulation of the blood is the outstanding essential for good health. It is true that cold bathing is, in certain conditions, a valuable procedure, but abuse of this powerful agency is certain to produce harm. Unless there is prompt reaction after cold applications to the surface of the body, there are few measures more dangerous.

Cold contracts and capillaries and forces the blood elsewhere from the point of contact. If the surface of the body be chilled for a considerable time, the blood is driven into the lungs or other internal organs with great force, and stasis will result. Thousands of invisible bacteria find lodgement in the congested tissues, and multiply rapidly—as in pneumonia, arthritis and even meningitis. Cold is a much more deceptive agency than heat, the latter warning its victims in time, while cold may inaugurate a fatal disease, without imperative admonition. The subject of "winter bronchitis" will occur with the advent of cold weather. Many elderly people are afflicted with this distressing malady, and swallow barrels of cough mixtures which may or may not give temporary relief. Air your bedrooms daily, and close them at night. Aging people should not sleep in cold air, neither should they be exposed to sudden changes of temperature. There is no sense in changing a comfortable room in to a most uncomfortable one, and warm air may be just as pure as cold.

Praises Phone Service
The telephone service of the United States is a thing of which we are properly proud, says the Nation's Business. No other country approaches us in the number of telephone br in the use made of them. One person in about eight in this country has a telephone. And it is by no means a city convenience. The telephone is almost as much a part of the farmer's life as the plow.

Announce Engagement
Clayton, Oct. 19.—On Monday evening Oct. 12, Mr. and Mrs. Ronnie Ellis delightfully entertained a group of friends at their lovely home.

The guests were received by Mr. and Mrs. Ellis and ushered to the punch bowl where Miss Delia Austin graciously presided. There they found their places, marked with attractive favors, at tables arranged for progressive Caroms.

In the midst of the excitement of the game the lights were turned low and a charming little fairy, Miss Catherine Ellis, lovely in white tarleton and silver, told the fortunes of the guests. These brought forth many laughs until

the last fortune which was received with happiness by all present. "November 17, 1925, Mr. Leroy Jordan and Miss Helen Ellis will begin to solve life's problems together."

After an unusual contest, "Love Letters" was puzzled out, Mrs. Ellis and Miss Austin, assisted by little Miss Alice Barbour and Catherine Ellis, served the guests with a delicious ice course.

Those making the highest score at arams, Miss Blanche Ellis and Mr. Vann Stringfield, received lovely handkerchiefs. Miss Helen Ellis as honor guest was presented with a beautiful piece of silver.

Western Union set a circuit of 7,400 miles to enable the Lord Mayor of London to exchange greetings with San Francisco's Mayor at the opening of California's Diamond jubilee.

Look over the big premium list. Compete for premiums offered. The biggest and best fair ever held.
