Mississippi Lady Says She Took Black-Draught for These Symptoms and Was "Greatly Relieved."

Starkville, Miss.—"I have been a sufferer of Black-Draught for about twenty years," says Mrs. C. E. Burdette, of E. F. D. 5, this city.

"I used Black-Draught first for constipation," continues Mrs. Burdette. "I would feel dull, stupid, and have severe headaches, even feverish. I had an uneasy, tight feeling in my stomach."

"I read quite a bit about Black-Draught. I began using it and soon my bowels acted regularly and I was greatly relieved. I used it every once in a while for about eighteen years. About two years ago I found I was having indigestion, a tight smothering in my chest, then severe pain, especially after eating sweets. I commenced taking just a pinch of Black-Draught after meals and by doing this I could eat about anything."

"I gave Black-Draught to my child for colds and headaches. I can certainly recommend it."

Theodore's Black-Draught is recommended by thousands of others for the relief of indigestion, biliousness and simple ailments due to constipation. Safe, easy to take. Costs only 1 cent a dose. NC-171

Essex Coach
The Greatest Car Value in the World Selling Below One Thousand Dollars

23 REASONS WHY--

1. The lowest priced six cylinder in the world.
2. A fully counter balanced crank shaft. That is a guarantee for smooth running engine an eliminates vibration.
3. The Essex frame is far heavier and stiffer than that of any other car below \$1000.
4. The Chassis lubrication is unexcelled by any other car selling below \$1000.
5. Essex spring shackles are adjustable to take up wear. The Essex is the only small car that has this desirable feature.
6. The Essex crank case has a carefully worked out system of ventilation that drives off vapors from gasoline thus preventing dilution.
7. The Carburetor is so designed that it is almost free from dust, taking in its air from a box covering the entire exhaust manifold. Most all small cars take air directly into the carburetor.
8. The Special vacuum tank is so designed with petcocks and traps that the bottom can be drained at ease.
9. The Essex has automatic ignition advance, whose curve has been worked out exactly for the motor.
10. Radiator Shutters are provided on the Essex. No other car near the price has this feature.
11. The Silent timing chain with adjustment for driving the cam shaft, generator, oil pump, distributor. These features are only found in the expensive cars.
12. The Essex motor has roller tapite, which are used on high priced cars, but no other car near the price of the Essex uses them. They are better than the Mushroom type that are used on cars selling near the price of the Essex.
13. The Essex has aluminum alloy pistons. Though expensive, they are preferable to iron pistons, for the reason of lightness and heat conductivity. Their use permits higher compression. They are used by most higher priced cars, such as Packard, Lincoln etc.
14. The Essex has a four pinion type Differential. This is essential to quiet rear axle. Probably no other car selling for less than \$1200 has two pinion differentials.
15. The Essex springs are 2 inches wide, while other cars below \$1000 has 1 3-4 springs. The wide springs prevent breaks and assures easy riding.
16. The Essex brakes are 14 3-8 inches. No other small car has drums as large. This is one of the reason for their great efficiency and ease of application and protection.
17. The Essex steering gear is of full worm and wheel type, and provided with ball and trust bearings. Most small cars have plain thrust washers which are cheap.
18. The Essex propeller shaft has two metal joints, and two inches diameter. Most small cars use 1 1-2 in. propeller shaft.
19. Essex has approved transmission lock. You can leave your car without fear of its being stolen.
20. The Essex front seats have more leg room than any other small car, and are adjustable.
21. The Essex Steering Wheel is genuine walnut. Many other small cars use rubber or composition. They are cheaper than walnut. The position of the wheel can be easily adjusted up or down four inches.
22. The Essex has unquestionably the strongest axles, wheels, spindles and steering parts of any small car built.
23. The Essex has an all steel body, and made as rigid as a steel train.

No other car in the world, selling near the price of the Essex, has all the above features built into the car.
