Performance Counts! Watch the new Ford on the hills, in traffic, and on the open road, and you will know that it is a truly great car

THE minute you see the new Ford car you will be delighted with its low, smart lines and the artistic color combinations. There, you will say, is a truly modern car.

But a still greater thrill awaits you when you slip into the roomy seat behind the wheel and start away for your first ride.

You will like the feeling of power that the new Ford gives you—the comfortable, prideful feeling that comes from having a car worthy of any occasion and equal to every emergency.

You will like the flexibility and safety of the new Ford car as you weave in and out of traffic—its flashing pick-up as the light turns green and the sign says "Go." You will like its smooth, quiet steadiness on the open road where you can lazy along according to your mood, or do 55 and even 65 miles an hour if you desire. The new Ford has unusual speed—no doubt of that!

There are still other reasons why the new Ford car is a great car to own and drive. Three important reasons that mean a great deal to you: reliability—economy—long life.

The new Ford is made to stand up under thousands of miles of steady running over all kinds of roads, and save you many dollars in repair bills.

Come in and see this great new car. Inspect it carefully—part by part. Then know the thrill of driving it. By its performance you will realize that there is nothing quite like it anywhere in design, quality and price.
