

furnish latter news from Europe. But up to the present time we have been disappointed—Nothing has been received. Our latest London date is the 8th of November; more than two months back.—*ib.*

Raleigh, Jan. 13.—We have the pleasure to state, that the President of the U. States, has appointed Hutchins G. Burton, Esq. (our late Governor) Governor of the Territory of Arkansas.—*Reg.*

Death of Mrs. Jackson.—The Nashville Banner brings the melancholy intelligence, that Mrs. Rachel Jackson, wife of Gen. Andrew Jackson, died on the 22d Dec'r. She had been unwell for several days, but her illness was not expected to be dangerous until the hour before her death. The event stopped the preparations for a dinner and ball, intended to have been given to the General on the 23d ult.—*ib.*

Supreme Court.—Wm. A. Graham, of Oxford, has received Superior Court Licence, and Richard H. Lewis, of Edgecombe, Samuel S. Johnston of Northampton, William A. Wright of New-Hanover, and Henry B. Elliot of Randolph County, have been admitted to County Court practice.—*ib.*

Dividends.—The Banks of Cape Fear and Newbern have, respectively, declared Dividends of two per cent. on their Capital Stock, for the last 6 months.

Dismal Swamp Canal.—We have the gratification to state, that the water was let into the Canal on Wednesday, and that a boat loaded with Staves, from the South end, is expected to arrive here this day.—*Norfolk Beacon.*

Vermont Cotton.—Mr. Isaac Branch has raised some cotton the last year in the state of Vermont, the first that ever grew in that state. It was planted about the first of May, and gathered the last of November.

Emigration.—At Washington, in the House of Representatives on Tuesday last, when Mr. Floyd's bill for the occupation of the mouth of the Oregon (Columbia) river was under discussion, Mr. Everett, of Massachusetts, remarked that in the part of the country from which he came, there was an association of three thousand individuals, respectable farmers and industrious artisans, who stood ready to embark in the enterprise of settling the new Territory, so soon as the permission and protection of the government should be secured to them.—*Nat. Gaz.*

Sugar Cane.—The Milledgeville Journal, speaking of the cultivation of the sugar cane in the state of Georgia mentions the plantation of Col. R. A. Blount, in Washington county. That gentleman has been several years engaged in making experiments of the cultivation of this plant, and finds no difficulty in raising and bringing it to perfection. The Journal anticipates the time

when the pine barren region, now an uncultivated desert, a blot on the map of that state, will be covered with cane plantations and vineyards.

Silk Exports.—A correspondent of the National Intelligencer predicts that this country will export the raw material of this article, within a few years after our attention is well directed to its culture, to an extent somewhat comparative with that of cotton. France, he says, imports one third of the raw material she manufactures, and she would become our best customer.

Eastern Boundary.—The Portland Argus contends that the right of Maine is perfectly clear to nearly all the land involved in the important Boundary question—and that this portion of the claim should never have been submitted to an umpirage but maintained by arms, if it could not have been otherwise secured.—The claim goes for a territory of about 10,000 square miles—more than 6,000,000 of acres of valuable soil, worth a dollar an acre. The district would form 180 townships, of six miles square—and in 15 or 20 years might contain a population of from 100,000 to 200,000 inhabitants.

Georgia.—A law has been passed by the Legislature of this State disqualifying from office, any person who fights a duel in the State, or elsewhere.

A crazy and impious knave named Crane, in Ohio, pretending to be the brother of our Saviour, asks Congress for 10 or 12 thousand dollars per annum, "to enable him to perform his high functions as temporal governor of the world."

It is stated in the newspapers that there is a girl from Kentucky in exhibition in Nashville, Tennessee, who is entirely destitute of arms. She is 13 years old, and her form is good, excepting that she has no stump or protuberance about the shoulder. She is healthy, cheerful and intelligent, and can knit with astonishing ease and rapidity, with her toes. For want of arms to ballance herself, she walks with some difficulty and awkwardness.

Heat.—It is said in a letter from Paris that much encouragement is given to the following new invention for heating rooms: "A piece of quick lime dipped into water, and shut hermetically into a box constructed for the purpose, gives almost a purgatory heat, and prevents the necessity of fire during the winter."

The Adams paper, lately established in Albany, thus announces its death:—"Yesterday Jackson was elected President—to-day is thanksgiving—to-morrow we shut up shop."
