

TARBOROUGH FREE PRESS.

Whole No. 522.

Tarborough, (Edgecombe County, N. C.) Friday, September 26, 1834.

Vol. X—No. 54.

The "Tarborough Free Press,"

BY GEORGE HOWARD,

Is published weekly, at Two Dollars and Fifty Cents per year, if paid in advance—or, Three Dollars, at the expiration of the subscription year. For any period less than a year, Twenty-five Cents per month. Subscribers are at liberty to discontinue at any time, on giving notice thereof and paying arrears—those residing at a distance must invariably pay in advance, or give a responsible reference in this vicinity.

Advertisements, not exceeding 16 lines, will be inserted at 50 cents the first insertion, and 25 cents each continuance. Longer ones at that rate for every 16 lines. Advertisements must be marked the number of insertions required, or they will be continued until otherwise ordered, and charged accordingly.

Letters addressed to the Editor must be post paid, or they may not be attended to.

DOMESTIC.

English Emissaries.—Another English Abolition emissary has arrived in the United States. His name is Thompson. He has been sent over by the Emancipation Society, of England, to lecture the people of the north into the expediency of immediate emancipation. We doubt not but he will be a fit associate for the scoundrel Stuart, who is going through the villages of the north instigating the people to interfere with the slaves of the south. The New York Commercial says, that Stuart, "recently disseminated as rank sedition at Whitesborough, as was ever uttered by the lips of man. He there distinctly inculcated *A violation of the laws.* How long would he be suffered, in his own country, to enjoin disobedience, in a public assembly, to a law of parliament?"

We hope Stuart and his associate Thompson will come to the South. There is the proper place to try the effects of his eloquence. It is a slow business to persuade the north to persuade the south, that it is to their interest to emancipate the slaves. They had better first ascertain if the south is in a humour to be persuaded, and to do this, let Tappan and his English missionaries make a tour through the south. They will know more about the subject when they get back than they do now.—*U. S. Tel.*

Another Riot.—We regret to learn from the Columbia (Pa.) Spy, that another exhibition of that mad spirit of anarchy and violence by which some of our principal cities have lately been disgraced, was made in that place on the night of Tuesday last. At the dead hour of midnight—fit time for such deeds of darkness—a band of riotous persons assembled and attacked a house in Front street, occupied by a black man, the porch and a part of the frame of which they tore down, the inmates leaving the building at the first alarm. Thence the mob proceeded to the office of another colored person, who deals in lumber, broke open the windows and door, rifled the desk, and scattered the papers along the pavement. After attempting to upset the building, they marched off, having "glory enough for one night." Such proceedings are disgraceful to the character of the town, subversive of the quiet and safety of the inhabitants and insulting to the laws under which we live.

Philad. Inq.

At Trenton, (N. J.) there has been a slight outpouring of the mobbish spirit. On Sunday night last, a number of persons collected around the colored Methodist church of that place, and, after a few yells and shouts, demolished the windows—creating great alarm among the congregation, who fled in terror; when the rioters, following the example, also ran away and escaped.

The late Johnson Cleaveland, Esq. of Leesburg, Va., in his will has placed at the option of his slaves their liberty, on condition that they emigrate to Liberia. They have two years allowed them for consideration, and should they decline the offer, they can make choice of their masters from amongst any of his remain-

ing relatives: so that a man of kind disposition and even temper, will be rewarded in a manner little expected.

Nelson, a runaway slave, belonging to Richard Chilton, of Campbell, Va., has been sentenced to be hung on the 31st of October, for the murder of Edward Jones, of Lynchburg, who had pursued him with the intent of arresting and returning him to his master.

Bank of the State.—On to-morrow, this Institution commences its operations, and under the most favorable auspices. The Bank being based upon a substantial capital, it will be prepared at all times to redeem its Notes with Specie, or with what may be considered by the Noteholder as its equivalent. Its management has been committed to those who have a positive interest in its concerns—to men of business—men, whose pursuits have led them to make themselves conversant with the nature of Banking operations; whose views, while we hope they will be of an enlarged character, will at the same time, we are confident, be controlled by sober judgment and sound discretion.

The Bank will discount only what is termed "business paper"—that is, all loans will be required to be paid in four equal instalments of 88 days each. Special loans for a term not exceeding six months, will also be made by the Directors in their discretion, but all such loans must be paid in full, at maturity. For the information of persons residing at a distance, we subjoin the form of the Note adopted by the Institution:

DOLLARS. *Raleigh,* _____ 183
Eighty-eight days after _____ we Principal, and _____ Securities, promise to pay to Charles Dewey, Cashier, or order, _____ Dollars for value received, negotiable and payable at the Bank of the State of North Carolina, at Raleigh. *Raleigh Reg.*

The Convention of the People of the State of Tennessee, which has been in constant session in Nashville since the 12th of May last, closed its labors on Saturday the 30th of August. They have adopted a revised and amended Constitution, which will be immediately submitted to the people, by the circulation of fifteen thousand copies of it, side by side with the old Constitution, for their ratification or rejection at an election to be held for that purpose on the first Thursday and Friday in March next.—*ib.*

Supreme Court of the United States.—Several of our cotemporaries in this State, have named Judge Gaston as a proper person to fill the vacant seat on the Bench of the Supreme Court of the United States.—His fitness in every respect no one can question, but the fact seems to be lost sight of, that he does not reside within the Judicial District which the vacancy comprehends, and is therefore ineligible.—*ib.*

The Secretary of the Treasury has given notice that the five million loan of 1821 will be paid off on the 2d of January next. In the mean time, these proprietors of the stock, who desire the reimbursement of their certificates before that period, can receive the amount thereof with interest up to the day of their surrender, on presentation at the Loan offices where the same may stand credited. It is added that persons desirous of selling will find facilities for that object, by applying to any of the selected Deposit Banks in the State in which they reside.

Arrests for Mail Depredations.—We learn that the Postmaster and his Assistant, of Wytche C. H., Virginia, have been arrested by a Special Agent of the Post Office Department, and held to bail, with sureties each of 2,000 dollars, to answer the charge of withdrawing letters from the mails which had passed their of-

fice; and that they will be tried, at that place, on the 17th instant. The Post Office was immediately placed in charge of a reputable citizen, who has been appointed Postmaster.—*Globe.*

A Good "Experiment."—The packet ship Caledonia, which sails for Liverpool this day, takes out from Mr. Robert Stevens, two of our celebrated running mares—Polly Hopkins and Betsey Ransom; with a view of testing the "experiment" (we like the word) of crossing their blood with the celebrated English racer Priam. The forth-coming progeny of the justly celebrated animals being by Eclipse, will be trained and tested in England with the pure English blood, while the future progeny, from the best English horses, will be regularly shipped to this country at the age of one year, and in due time make their appearance on the American turf. This is, indeed, an "experiment" worthy alike of the enterprise of Mr. Stevens and of the deep interest he has recently manifested in improving our breed of horses. To him, more than all others, are we indebted for the perfection we have reached in steamboats and locomotives; and to him will be indebted for testing the relative speed and bottom of the best English and American race horses at this day. The "experiment" is an interesting one, and all who are admirers of the horse, and can enjoy the sports of the turf, will feel an interest in its successful issue.—*N. Y. Courier.*

Summary Work!—We learn from a gentleman who came passenger in the steamboat Patrick Henry from Richmond, on Wednesday afternoon, that seven of the principal gambling establishments (or "Hells," as they are now commonly and not inaptly called) in that city, located in the vicinity of the Eagle Hotel, were on Monday night last completely broken up by the populace, who entered them in large bodies, and proceeded to demolish every thing before them. *Faro tables, E O's, A B C's, Roulettes,* and the other various implements of the black art, with all the costly furniture of these temples of Vice, fell an indiscriminate sacrifice in the work of destruction.—The next morning, our informant adds, the populace completed the work of the preceding night, by removing the wreck of furniture and gambling utensils into the street, where they piled it all up in one common mass (some little distance above the Eagle Hotel); and made a bonfire of the whole concern. The furniture was of the most splendid and fashionable description.—Brussels carpets, Grecian sofas, girandoles, mirrors, chandeliers, tables, chairs, &c.—Every thing corresponding with the most refined luxury. The number of the citizens engaged in this work of demolition is estimated at 500.—*Norfolk Her.*

A small schooner sunk just below the forts, near Norfolk, has been raised and towed up to the city. She proves to be the Happy Return of Edenton, having nothing of any value on board, and ascertained to have been scuttled. From these facts it is judged that there has been some foul play.—*ib.*

A Fugitive taken.—Guilliam Tharp, who has been charged with the murder of Alsey Denton, of Franklin county in this State, and for whom a reward of \$200 was offered by the Governor on the 28th November last, was apprehended a few days ago at Milledgeville, Ga. and brought to this place on Wednesday evening last, and is now confined in our jail, to await the further orders of the Governor.

Tharp has been taken out of jail by Mr. B. P. Jordan, who had been to Milledgeville with commission from the Governor to demand him.

Charlotte Journal.

The Blind Man's Bible.—We have before us, in a goodly sized quarto volumes, the Gospel of St. Mark, printed, or rather embossed, for the use of the blind. This is the plan. It is the handy work of Mr. Snider, the gentleman who acts as secretary of the institution, and is a beautiful illustration, if not fulfilment, of the prophecy, that "the blind shall see." This admirable specimen of the art of embossing letters, is worthy the attention of the curious.—*U. S. Gazette.*

A young girl was shot on Thursday night last, at Fells Point, Baltimore, under the following distressing circumstances. It appears while laboring under somnambulism, she got out of bed and went into the chamber of the lady and gentleman of the house. The gentleman awakened, by a noise in his room, enquired several times who was there, and received no answer, and seeing a object moving about his room in the dark, he seized a gun and fired, supposing it to be a robber, when the girl fell, having been mortally wounded, receiving the whole charge in her body.

Quite a serious rebellion is said to have broken out in Delaware College. Eight students have been suspended in consequence, and four others induced to leave the institution, when partial tranquillity was restored.

An attempt to destroy the family of Dr. Sweet, of Norton, was lately made by a servant girl of the family, who mixed a large quantity of arsenic with their food, of which she herself partook. The whole of the family were taken very ill, when they accused her of having poisoned the food. She acknowledged—when by timely remedies, they were all restored to health. The girl was also sick. To add to the enormity of the offence, when two of the children were crying from the thirst created by the action of the poison, she gave them water, strongly impregnated with arsenic.

A very ingenious machine has been invented and made solely by Mr. Ackrill, of Boston. It is built to accommodate one person, who will, with great ease, be able to propel it ten miles an hour on a common road. The principle on which it is constructed is entirely new, and may be applied to any purpose in machinery; it is anticipated it will introduce quite a new era in mechanics.

A Curiosity.—In the Ladies' Institute, of this city, conducted by the Rev. R. W. Cushman, in Arch, near Seventh street, there is a clock, which for the ingenious round of duty that it is made to perform, will compare with any curiosity of the present day. By an invention of Mr. Cushman, this clock is made to ring a bell, calling the scholars together in the morning, and when they are assembled, it presents them with the word "study," on the upper part of the dial. When the morning is half over, the bell strikes again, and the word "recess," takes the place of "study." By a vote of the scholars, it was decided that not a whisper should be made in the school hours, except during this recess. While that word presents itself, for three minutes only, the school is in a buzz; but when study returns, implicit obedience follows. Several other words are presented by the same arrangement and the effect is admirable. Its advantages are seen in the perfect order which remains in the Institute; an establishment, by the way, surpassed by none in this city for the excellence of its conduct, and the thorough education of the scholars there instructed. All the departments are sustained by the most competent teachers; the philosophical apparatus costly, and extensive, and the labours of the President unceasing.
