FOR THE FREE PRESS.

THE TORY.

Come all ye that have the time to spare,
Young, old, lame, halt, blind and fair;
Let me sing you a song, a song of glory,
And tell you all what is a modern Tory.

'Tis he, they say, who fought on Monmouth's plains,
Who spurned in days of yore the tyrant's chains;
Who fell upon the battle field all gory,
And fighting for his country won the name of Tory.

'Tis he who made the British lion cower,
When o'er our country battle's front did lower;
Who amid the deadly fight and wild foray,
Did bleed for freedom—ah, he's the Tory.

'Tis he who on Camden's heights and banks of Pee Dee,
Most gallantly did spill his blood to make us free,
Whose veteran head by age has become quite hoary,

Methinks, he must look most devilish like a Tory.

'Tis he who fought to save our "beauty and booty,"

Who saved our cotton bags, and gals both snowy white and sooty;

Who fought to save his country, not for glory,
Surely this is he, they say, that must be a Tory.

'Tis he who chose to save the country, rather than the Bank,

Who'd rather die than hear on him a slave's chains clank;

Who lost both blood and treasure, if you'll believe my story,

And fighting for his country, won the name of Tory.

A BRIDE.

Young Beauty at the altar! Ye may go
And rifle earth of all its loveliness,
And of all things created hither bring
The richest and richest—but alas!
The world is all too poor to rival this!

Ye summon nothing from the place of dreams,
The orient realm of fancy that can cope,
In all its passionate devotedness,
With this chaste, silent picture of the heart!
Youth, bud-encircled youth, and purity,
Yielding its bloom and fragrance up—in tears!
D. C. B.

A new project.—General Green, of the Washington Telegraph, has announced his intention to open an institution at the seat of government for the education of apprentices to the printing business. His plan is to take 200 students, who are to be divided in classes, one to compose on the Telegraph a certain number of hours in the day, and on several literary and scientific works; the remaining hours to study. Their education is to be perfect, and they are to be first rate compositors and proof readers; to be fed and clothed, and the surplus of wages laid by for them at the end of their apprenticeship. The Typographical Society have protested in strong language against what they conceive is a monopoly, which may finally seriously injure their interests, by affording labor on cheap terms. There can be no doubt that for a time it may injure the interests of journeymen, but it is like all improvements that cheapen labor; they cannot be prevented, and in a free country a man has a right to carry any legal project into execution. Gen. Green certainly aims at being considered a useful citizen—he is so; the plan is a beneficial one, although he may derive a pecuniary benefit from it. It promises to turn out printers of talent, education, character and integrity; editors of enlarged views; candidates for the honors of the country; sober, moral, high minded men—Franklins and Rittenhouses. Surely such a project merits encouragement and approbation.—*N. Y. Star.*

☞ A city correspondent of the Boston Atlas describes an India rubber dress from the Roxbury manufactory, by which a person is enabled to descend in water for the search of property. It was tried by a Mr. Norcross lately, in endeavoring to recover some of the coal which sunk in the river at Boston in consequence of the wharf giving way beneath it. "From the perfect construction of the dress, the person is kept completely dry—is at lib-

erty to use his hands; and to walk on the bed of the river under any depth of water; having a free supply of air by means of tubes, the person can remain under water six hours at a time."—*ib.*

Flying Machine.—The Cincinnati Republican, says, "Mr. Masson, an ingenious mechanic, has been engaged some months in constructing a machine or vehicle of this description, in which he expects to be able to navigate the air by the force of steam. There is nothing of the balloon principle connected with the apparatus. It is to be elevated and propelled by machinery, in the shape of wings. We have looked at the machine, which is now nearly finished, and whether it prove successful or unsuccessful, it is a beautiful and ingenious piece of mechanism."

New Mechanical Power.—An ingenious mechanic at Brussels has just applied a new power to mechanics, from which great results are expected. This new power is galvanism. Across a fly-wheel which is to give motion to the machine he has placed a metallic bar, previously magnetised by a galvanic pile, and within the attraction of two very powerful magnets. The moment that the bar arrives in a rotatory course at the limit of the attractive power, and where it would necessarily stand still, the inventor, by the application of galvanism suddenly converts the attractive into a repulsive power, which continues the motion in the same direction, and by the alternations, well managed, the wheel acquires a rapid rotation. The experiment is said to have been completely successful, and the machine worked for a whole hour.

A Paris paper mentions that for some days past a person has been riding through parts of the city in a car with sails, acted upon by the wind, with entire success. He stopped at several places at pleasure, and appeared to have complete control of the machine. He even mounted a hilly street, with the wind almost "a-head." If things go on thus, steam power will soon be at a discount.

Embroidering Machine.—A very surprising machine constructed in the establishment of M. Kochin, is an embroidering machine, which, with great rapidity and the most unerring accuracy, covers the texture of the silk, cotton, or wool, submitted to its operation, with flowers and designs of every possible variety and hue. That a mere inanimate machine could be capable of carrying on so complicated and delicate a work as embroidery, appears on first consideration, almost an impossibility, and even after seeing some of its beautifully embroidered products, a doubt still lurks in the mind, and one would wish to see it at its handy-work, to be perfectly convinced of the fact.

Battle with the Pawnee Indians.—A report is going the rounds of the newspapers, that the U. S. Dragoons under the command of Col. Dodge, have had an engagement with the Pawnee Indians, in which the latter were defeated with considerable loss. It may be proper to state, that the War Department has received no official or other credible account of any such engagement.

☞ The Philadelphia Inquirer states that the Emperor of Russia has, through the medium of the Baron de Krudener, Minister Plenipotentiary at Washington, presented Joshua Shaw, Esq. artist of the former city, with five hundred dollars, for an improved percussion cannon lock, invented by Mr. Shaw.

☞ It is said that Dr. Hannah, of Washington, has invented an apparatus for removing the stone from the bladder without cutting, or scarcely pain the patient.

☞ The crowd of pilgrims, each with torch in hand, at the Holy Sepulchre at Jerusalem, was so great on Holy Saturday in May last, that the air became oppressive, and many in attempting to gain the door were crushed to death. Ibrahim Pacha was present, and lost his sabre and diamonds.

COTTON GINS.

THE Subscriber, who for several years past, has been engaged in the

Gin Making business,
In Kinston, has established himself
IN GREENVILLE,

Where he carries on the above business in all its various branches. All those who wish to supply themselves with Gins of the best quality, are respectfully solicited to apply to the Subscriber personally, or by letter. All orders for Gins will be promptly executed. From the Subscriber's long experience in his business; and from the approbation which his work has hitherto met with, he hesitates not to promise entire satisfaction to all who may see fit to extend to him their patronage. Gins out of order will be expeditiously repaired. The Subscriber takes the liberty of calling the attention of those who wish to procure new Gins, or to have old Gins repaired, to the expediency of applying to him in time. When all wait as is usually the case, until the work is wanted, it causes such a pressure of business, that many are obliged of necessity to submit to a longer delay than they wish.

ALLEN TISON,

In connexion with this establishment, carries on

The Lock and Gunsmith business,
He also makes *Saw Mill Boxes, and Mill Inks, and Gudgeons, of a composition invented by Daniel Peck, of Raleigh—Grist Mill Spindles, with Steel Collars, (turned.)* These articles equal to any manufactured in the United States.

All letters and orders must be directed to the Subscriber, at Greenville.

Aug. 29, 1834.

Land for Sale.

BEING anxious to move to the West, I offer for sale the Tract of Land whereon I now live, containing

About one Thousand Acres.

It is a healthy situation, in Nash county, on Stony Creek, about three miles above the great Falls of Tar River, with a commodious two story dwelling house (new,) and other out houses; apple and peach orchards sufficient to make 15 or 20 barrels brandy, besides other fruit trees. The land is of tolerable good quality and well watered. On the said Stony Creek (a constant stream) there is an excellent grist and saw mill, cotton machine, &c. (on solid rock foundation,) all in good order. Long credit can be given if best suits the purchaser, or negroes will be taken in part payment.

TIMO. TERRELL.

2d September, 1833.

PAMPHLETS,
