A Matter of Sentiment.

ougaboo in the children's nurserybook, "her nose went out and mouth went in." She wasn't much larger than a girl eight years old; and she had fallen down cellar and broken her wrist, been thrown out of a carriage and put her shoulder out of joint; and being as bald as a baby, she wore the funniest of small "russet-fronts" under little "mob-caps," so that it was no wonder people looked at her and smiled. Her shrewd, twinkling eyes usually smiled back. Aunt Remember cared little what people thought of her. She was much more occupied either?" remarked Aunt Remember. her last words. n deciding what she thought of

And let me assure you she was no insignificant person in her circle. No fairy god mother ever was more fearto-than Aunt Remember. She was shrewd, she was witty, she had a little office down in Bond Street. sharp tongue of her own-more, she

his wife, who had three daughters. People said Aunt Remember would eave her money to one of these daughters, and Aunt Remember said that she should, "to the one who pleased her best." The thing was to know for the present. hair. I do not think it a sin to have red hair, but Mollie thought it was. Had she not been reproached with it since her tenderest years? To-be-sure, it was as soft as silk, and an artist might have considered the burnished ripples very lovely, as they swept away from a complexion whose pink was prettier than the tint of any seashell: but the color of her hair was a sore subject with Mollie. She was never quite happy, unless she had altogether forgotton the matter, and as Mollie was usually exceedingly busy, she generally had very good success

If this is so it is a great advance in the spectroscopic study of the

These are only some of the discov eries made by the astronomers in Egypt, and which have been so slow to leak out. There are a great many other things of public interest that they could throw light on: for instance, the sword-shaped comet which they discovered close to the sun and photographed, and the discovery of indications of an atmosphere in the moon, the particulars of which would interest everybody, especially if they can give us any hope that the moon is not a dead world after all .- N. Y. Sun.

He who lives happily through the short rose-days of his youth, and far away from envy and complaining strives to be good, still enjoys the days of his youth when the winter of life approaches, and contentment line of the Canadian River, and its hair, and be young while you can, and virtue scatter flowers along his for it will not be many years before path. Without fear and without

A Novel Steamship,

Robert Fryer, of New York, has ing observations were made during invented a novel steamship on a the eclipse in May, but beyond that principle heretofore unheard of which accounts, no doubt, Napoleon I. used. forms about his poles, while when the keel to adapt the vessel for use on of minutes, Over the front windows substances we know are not merely is made watertight so that in the al requisites for a dressing box, most of The "Oceanic," now building at

transportation. man," said a Detroit youth, as he No work has been done on the South smoothed down the old man's gray locks the other evening. "How do you know that, Willie?" "Oh. heard some men down at the store say that you killed thousands of soldiers during the war." "Me? Why, I was a beef contractor for the army.' 'Yes, that's what they said !" explained young innocence, as he slid for the kitchen.

A wire fence, running from Indian Territory west across the Texas Panhandle, and 35 miles into New Mexico, is projected and largely under contract. Its course will be along the purpose is to stop the drift of the northern cattle. The fence will be over 200 miles long.

The Origin of the Sleeping Car.

Mr. W. Barnet Le Van, M. E., of Philadelphia, says: "From all room, and parlor car' that ever was taken at Waterloo, and was present by whom it was afterward sold to Mr. Bullock for \$12,500. It eventually curious and convenient chario; of the poses of a pantry and a kitchen, tor it has places for holding and preparing refreshments, which, by the aid of a lamp, could be heated in the carriage. It served also for a bedroom. a dressing-room, an office, etc. The seat is divided into two by a partition about six inches high. The exterior of this ingenious vehicle is in the form and dimensions of our large coaches, except that it has a projection in front of about two feet, the right-hand half of which is open to the inside to receive the feet, thus forming a bed, while the left-hand half contained a "Beyond the projection in front

thread, and silk. Each of these articles were fitted into recesses most the solid wood, in which they were spherical wheels are to be 24 feet in packed close together, and many one within the other, in such a narrow ed. Recently, the inhabitants of the space that, on seeing them arranged. Twenty-fourth ward of New York it appeared impossible for them ever were considerably astonished upon to be put into so small a compass. seeing an extraordinary looking ve- At the bottom of his toilet box, in gases leap from it like gigantic gev- hicle with three wheels, weighing divided recesses, were 2,000 gold were writing maternals, a looking Another interesting result of the re- ten Duyvil Creek, near the Hudson glass, combs, etc., a liquor case which river, and travelling to the water's had two bottles, one of Malaga wine. dence obtained of the existence of edge, not stop, but continue on over the other of rum; a silver sandwich the surface of the water as readily box, containing a plate, knives. pepper and salt boxes, mustard pot, ranges of solid mountains on the easily guided by hand, and propelled which the watches of the army were up part of the atmosphere of the exist between it and an ordinary boat diamond head dress (tiara) hat,

The accompanying diagram shows problems. If successful, it must tunnel under the Hudson River. The water, as the vessel for a given the New Jersey side has been very amount of this traffic can be built for | rapid, the North Tunnel having been what the ordinary vessel would cost, caried forward over 500 feet beyond and will perform double service. the point indicated in our isure of Nothing can be more unsinkable than Feb. 4. The completed tunnel now these buoyant globes; nothing can be measures 1,200 feet. The character stronger or lighter than the whole of the river bed continues to be the vessel made, as it will be, out of steel, same tough silt encountered nearer and presenting at every point to wind | the shore. Owing to the descending and wave the arch. Water is the slope of the tunnel, the air pressure great roadway of the world, and has been increased with the advance wheels the great vehicle. 'A perfect of the work, so that it is now 30 lbs. to combination of the two perfects the square inch. The tunnel is divided by two bulkheads, the first about 450 feet from the caisson, the second "Father, you are an awful brave about the same distance in advance.

> On the New York side, the difficult nature of the ground has prevented any rapid advance. The earth is a mixture of sand, gravel, and small bowlders, requiring the most careful and skillful management to prevent accidents. The heading is now about 35 feet from the caisson. A lawyer said sneeringly to a clergy-

man: "If I had a stupid son I'd make a minister out of him." The clergyman thought a moment and then quietly replied: "Sir, your father was not of your opinion, was he?"

Dyspepsia, heart-burn, nausea indigestion, etc., are always relieved by Brown's Iron Bitters.
