NOTES AND COMMENT.

The Chicago Tribune on Sunday, March 17, published a study of the earnings of certain classes of Chicago working people that is specially in derecting at a time when so much is said of prosperity. According to the showing of the Tribune there is a vast portion of Chicago's population whose earnings are so pitifully inadequate as to excite the wonder that actual star-vection does not exterminate them. The investigation was conducted by Mess Nelle Outten, a graduate stu-dent of the department of -sociology in the Uriversity of Chicago. Miss Outten found people working under al-most unbelievable conditions of fifth and cold and dasherse. The secution and cold and darkness. The particular industry that the investigated was "fibishing work" on clouding. Women were found working whose average weekly wages did not exceed forty cents, or a little less than \$21 a year, though of coursecflis must not be looked upon as an average case. Yet the statement is made that the aver-age of the wages paid in the sweat shops is only \$77 a year. The aver-
