knot that is tied by the machine can't be beat by any. These machines are labor stvers, and every a mer whohas five acres or more of oats, rye wheat, etc., should own one

The machinery that was used at the handle factory has been shipped back to Corry, Pa. It is to be regretted that this enterprising concern has been removed from our midst. The company found that the ssh timber in this section was not suited to their improve and initial next the ash timber in this section was not suited to their purpose, and, justly, decided that they must move elsewhere. We have been unable to find out at what point the suill will be located, but are in-formed that it will be some place in Indians. The removal of this former ppint the mill will be located, but are in-formed that it will be some place in Indiana. The removal of this factory takes from our town the highly esteemed and popular superintendent, Mr. D. A. Witzel. He is a man of sterling character and had his stay here been longer, he would have been of antold assistance to the town. The social circle of the town loses in his daughter, Miss Florence, one of its best and brightest lights. We are iudeed sorry to know that this estimable family will only be in Williamston for a few weeks more.

## NOTICE
