WASHINGTON LETTER.

June 30, 1902. "All hinges on the Philippine Bill," said Chairman Payne, of the Ways and Means Committee, Saturday, when I asked him the probable date of adjournment.

The currency provision, the House having legislated for a gold standard in the Philippines and the Senate having continued the currency on the present silver basis, is giving the conferees the greatest amount of trouble.

The Appalachian Bill, as passed by the Senate, carries an appropriation of \$10,000,000 and requires the Secretary of Agriculture to file with Congress a plat of the land he proposes to purchase.

The Immigration Bill passed by the House will also wait action until the short Session. The Senate Committee on Immigration reported the bill favorably and there is little doubt that it will pass.

On Thursday, Friday and Saturday, Admiral Dewey appeared before the Philippines Committee and furnished valuable testimony in regard to the taking of the city of Manila and the subsequent initiation of the Philippine Insurrection.

A recent decision of the Supreme Court of the District of Columbia places the inhabitants of the Philippine Islands in a somewhat equivocal position.

tion that the court had no power to take such action because, pending the action of congress, the government of the United States could not recognize a Filipino as a citizen of any country.

Acting Secretary of State Hill by the direction of the President, has already commenced negotiations with Senor Quesada, Minister from Cuba, looking to the formulation of a reciprocal treaty with the Island.

The engrossed copy of the Panama Canal Bill is now at the White House and requires only the signature of the President to become a law.

Popularity of the Peanut.

An observant State contemporary, considering the virtues of the "pindar," remarks that "they do say a South Carolina legislator can eat more pindars than anybody else."

It is a fact that the average South Carolina legislator is an abnormally fond of "pindars," as our contemporary calls the fruit scientifically known as the Arachis hypogaea.

In this article we have followed our contemporary in designating the Arachis hypogaea as the pindar, but there are many other names for this popular fruit.
