ating Meadows and Pastures.

A certain per cent, of the forage ps must of necessity be fed on form, and naturally it is good possible in food values. As a ty of clover to add protein to the n fid On heavy and re the best for mixing with timoof any of the pure grass seed, other point to be observed in of seed that bloom about the same time and not to have what it containing too many varities! For late grasses no mix-ture is better than timothy. Rhode

clover. and the diameter

With grasses grow exclusively for pastures an entirely different phase of the situation appears, and I planted one-third bushel Bliss grasses must be sown that will riumph potatocs on one-thirteenth grow vigorously throughout the of an acre, virgin soil. After get-ting land clear of all runners, that grasses suitable for meadows always the best for pasture. For ure, laid off rows with example, while timothy is one of shovel plow, drilled 20 pounds the best of meadow grasses it is a high-grade fertilizer in the rows poor pasture grass. In pasture and ran a furrow in that so as to making a close, thick turf should mix fertilizer with the earth. Next be obtained. Kentucky blue grass I cut the twenty pounds of pota- and fine red top, with from eight toes to single eyes and planted to ten pounds of small white clover seed mixed in will make a pasture grass that will be long lasting and furnish a large amount of nourish ing and milk-making food.

Turnips should be sown this onth. They make the best bulbs nd eight or ten inches the rows. The land should be mad rich with farm-yard manne an acid phosphate and be reduced by frequent cultivation to a fine state of tilth. Two pounds of seed will sow an acre in drills. Three or four de should be sown Keep free from weeds and cultiva frequently. We have grown twen ns to the acre, and ten ought sily to be grown.

It is with joy I tell you what Kodo did for me. I was troubled with my stomach for several months. Upon being advised to use kodol, I did so, and word advised to use koded, I did so, and work cannot tell the good it has done me. A neighbor had dyspepsia so that he had tried most everything. I told him to use Kodel. Words of gratitude have come to me from him because I recommended it.—Geo. W. Fry. Viola, Iown. Health and strength, of mind and body, depend on the stomach, and normal setticity. Clover Smothered by Manure.

It is very easy to destroy cloves by covering it with coarse manure it any season of the year. The large leaf of the clover dies down very quickly if not allowed access to light. But if manure has been partially rotted and is spread on clover in fall or early winter, frost will so pulverize it that when rolled or harrowed, as clover always should be in spring, the lumps of benefit instead of injuring the crop.

HIS SIGHT THREATENED.

"While picnicking last month my 11 year-old boy was poisoned by some weed or plant," says W. H. Dibble, of Sioux City, Is. "He rubbed the poison off his hands juto his eyes and for awhile we re afraid he would lose his sigh tion helped him and in a few days no no well no ever." For skin di bites, DeWitt's Witch Hazel Salve

op Selwyn to preach in his gave an impressive and beautifusermon, which at the same time was perfectly plain and simple

"Well sir, I don't think so m of it," rejoined the man. "It was so simple any child could have understood it. For my part I like a which beats yours for that, sir."-London Tit-Bits.

ter weed, which cows are fond of, McDuffle's Turpentine & Mutton Suet causing the milk to become so Lung Plaster is a certain cure for whoep ing cough, easy and comfortable, work-while you sleep. much affected that it is hardly fit for use. I find that by giving the cow about two tablespoonfuls qu

DAIRY DEPARTMENT.

Managing Dairy Cows.

The farm hand who knows how to milk properly is more valuable to the careful dairyman than any other help. To milk a cow requires and patience. The milk should be drawn slowly and steadily. Some cows have very tender teats, and if you want a well disposed cow be gentle in your treatment toward her, as she is raturally impatient and does not like rough handling. With constant irritation she will fail a quantity of milk. As the udder becomes filled with milk she is anxious to be relieved of its contents, and will seldom offer resistance without a

When a patient cow become ractious we can always trace it to the milker. Note this: We should not allow cows to stand a long time waiting to be milked. \Vhen cow give a large quantity of milk it is very painful when the u ider has filled to the utmost; therefore caus ing them to become very ; vervous A clergyman in Scotlant invited and restless. To delay mill ing at the proper time will do n ore to cause a cow to go dry before her period than anything else. She uld also be milked to the last drop, if possible, for the last p tion of milk is said to be the ric as much on meeting one of the est. Still another point: There as most regular members of his con-wany ways of conducting a dairy. Among them is feeding wholesome food, such as wheat bran and cornneal. Always be careful to keep the cows well salted, protected from bad weather, giving kind handling, sermon which confuses your head careful milking, regular feeding, for a week. I don't know any clean stabling, good ventilation and plenty of pure water. In some

sections we have what is called bit-

sugar at each meal for two or three days the milk is entirely relieved of the bitter taste.- G. B. Dillon in Nebraska Farmer.

The Value of a Cow.

A cow that produces 2,325 quarts yields within a fraction of 5,000 pounds. A good cow should produce 5,000 pounds of 3.75 to 4 per cent milk. At 3 cents a quart the son, W. R. White, Wm. M. Wilcash value of 5 000 pounds of the liams, S. N. Yarrell. milk is \$69.75. With good farm kept for \$40, which leaves a profit above the cost of feed of \$20.75. The labor cost should not exceed one good man to fifteen cows. Heard,s Dairyman.

Butter should be exposed to the air as little as possible from the time it is churned until it is marketed.

Care must be taken not to over work butter, as it is very important that the grain and textures be

One of the best remedies for cours in calves is raw eggs adminstered one a day for three days.

One of the best ways of adding to the fertility of the farm is by feeding the grain and fodder to dairy cows.

With brine salting no more salt

will enter globules of butter than it needs. The surplus will run off. The milk of heifers is neither so

ich or liberal in quantity as from he same cow after she grows older. In nearly all cases the cows will rater at all times when in the pas-

Sparking Pairs Stuck Past.

There is much indignation among the young residents of the Morris neighborhood section of Bloomfield, N. J., over the work of a practical joker who recently poured tar all along the coping of the stone bridge over the Yantacaw river at Franklin avenue near broad street.

The bridge is a favorite trysting place for young people. It was warm that night and the bridge was filled with young women and their escorts. All went well until one of the couples thought they would like some ice cream. As the young man attempted to jump from the coping his head went forward, but the rest of his body refused to follow.

He tried again and this time there was a ripping sound. The young man put his hand behind him and made for cover. When the young woman tried to jump down she found herself also stuck. Most of the young couple discovered that they were in the same fix. A crowd gathered and guyed them.

The bridge presented a curious appearance late in the evening with its bits of feminine and masculine apparrel stuck here and there .-New York Sun.

JUST LOOK AT HER.

Whence came that sprightly step, faultless skin, rich rosy complexion, smiling face. She looks and feels good. Here's her secret. She uses Dr. King's New Life Pill. Result,-all organs tive, digestion good, no headaches, no chance for "blues." Try them yourself Only 25c at any drug store.
