To be Condemned

The action of the chairman of the County Board of Commissioners in refusing to sign the order of the majority of the commissioners, endorsing Washington for the location of the Training School, is to be condemned. The chairman himself is to be condemned for losing his temper to that extent that he should order any citizen of Martin County from the commissioners' room, much less one of the officers of the county, put there by the citizens of the county to guard their interests.

The position of the chairman is inexcusable in that he is under oath to represent the people in such matters and not further his personal opinions or interests, and where there is an order by the majority of the commissioners it is his duty to sign it regardless of his own personal feelings.

There are a number of towns in Eastern North Carolina that are using every available means to secure the location of the Training School within their borders, and to this end the Chamber of Commerce of Washington wrote to the commissioners of Martin County asking them to endorse the sentiment of the people of the county in regards to the location of the school. The sentiment of the people as expressed by their representatives at the court house Monday was for Washington—the majority of the commissioners voting for Washington still the chairman refused to sign the order.

Mr. Salisbury acted very unwisely. Even though he had pledged himself for some other town it was his duty to sign the order and abide by the decision of the majority. He could easily have dissented and written his friends concerning the matter.

It is to be regretted that he lost his temper and ordered the clerk from the room.

With the coming of the summer season, the Department of Agriculture is again busy on what perhaps is one of the most important phases of American development, namely the good roads movement. This is a matter that should keenly interest every citizen of the United States, for it is the thing in which this country is the most backward of any civilized power on the globe, and it is one of the things that will do more than anything else to foster rural development, bring the farmer and the townsman close together and make the country a desirable quarter to live in. Of course, the department cannot go out and build roads all over the country, but it has a well-equipped force of experts and is ready and able to furnish the best scientific advice on road building for nothing to any community that wants it. The department even goes farther and puts down a mile or so of road as an object lesson wherever it can and the manufacturers of road ma-

Non-alcoholic Sarsaparilla

Ask your doctor to name some of the results of constipation. His long list will begin with sick-headache, biliousness, dyspepsia, thin blood, bad skin. Then ask him if he would recommend your using Ayer's Pills.

chinery furnish the machinery free for these demonstration stretches of road. Scientific road building is one of the best investments of time and money that any community can make, and it would be a good thing if the county would apply to the Secretary of Agriculture during the present season for such aid as the general government can and will give in starting the good road movement.

The press of the state, and in fact, every state where Governor Glenn speaks, speaks in the highest terms of him as a speaker, thinker and christian gentleman. He is hard pressed all the time to fill his engagements, and it is with difficulty that he can be secured to speak. It is a rare treat for the people of this community that he will be here the latter part of next week. The Governor will deliver the closing address for the Williamston Graded School next Friday night. He will also speak in the Methodist Church next Saturday morning, May 18, at 11 o'clock.

Governor Glenn did not call his words of wise admonition at the Presbyterian church on Sunday morning a sermon, but it was an effective discourse and made a stronger impression than many sermons. If Governor Glenn had gone into the ministry, he would have filled his church with hearers. —News & Observer.

On the front page of this issue will be found two articles written by two of the school children, these articles were handed in by the teacher of these children and asked that they be published. We take pleasure in publishing them. We are glad to see these children forming the writing habit.

A better man than R. J. Peck could not have been elected president of the Grand Lodge of Charitable Brotherhood. The delegates acted wisely in their choice and may rest assured that the interests of that order will be faithfully guarded, and the duties of the office conscientiously performed.

Secretary Loeb displays considerable courage by contemplating a step that will place him in the ranks of railroad presidents after he has seen how they get their bumps at the White House.

From Philadelphia comes the story of a man who died of grief over the death of his mother-in-law. And no doubt, some men will insist on having it sworn to before they will believe it.

Although Col. Watterson has been quoted as saying that Bryan talks too much, we cannot believe that he regards him as the only man in public life who has contracted the habit.

"Pocahontas was a good girl" says the Chicago News, "but she never wore a straight front". And if she were alive to-day she would find it difficult to keep a straight face.

In order to express different degrees of a new, but not yet popular malady, we shall have to speak of brain-storm, brain-hurricane, brain-cyclone and possibly brain-blizzard.

Now, word comes from Cuba that she cannot find 12,000 idle men to form a standing army. Perhaps the job looks too much like work to the average Cuban.

"What is a Democrat?" asks the N. Y. World. "What is a diplomat?" asks the Macon Telegraph. Are all the papers going to start guessing contests?

RESOLUTIONS OF RESPECT

In Memory of Eva Holliday, Passed by the Robersonville Sunday School

Whereas, it has pleased our Heavenly Father in His infinite wisdom and divine mercy to remove from our midst one of our most faithful members, therefore, be it resolved: First, That while we deplore our loss, we know it is her eternal gain. So we bow in humble submission to the divine will, knowing that he doeth all things well.

Second, That we extend to the bereaved family our heartfelt sympathy in this their hour of sore affliction.

Third, that we send a copy of these resolutions to The Enterprise, and record them in the minutes of our Sunday School.

Respectfully submitted,
Mrs. H. C. Norman,
Miss Alice Grimes,
Mrs. John D. Everett,
Committee.

Duke Again Goes Down in Defeat.

(Special)
In one of the most interesting games ever played on the Duke diamond, Buies Creek beat the home team Saturday by a score of 6 to 5.

Until the fifth inning it looked as if the home team would be victorious, but bunting hits at the right time, gave the banner to Buies Creek. Rogerson from Williamston, N. C., the star pitcher for Buies Creek, who pitches successfully the "spit ball," pitched a fine game, striking out 13 men, against 7 by Harrison for Duke. The features of the game were the three-bagger by Rogerson, and two baggers by Bethune and Sheeler for Buies Creek, while the fielding and umpiring by the Duke team were its features.

This is the second game between the two teams. The other was played on the B. C. A. diamond, the score being 10 to 5 in favor of the home team.

Body Found.

One day last week Mac Ryan, colored, of Bertie County was drowned at Round Top near Spellers Ferry. Ryan had been fishing and caught a large quantity of fish and was returning to the Bertie side of the river, his wife was standing on the river bank watching him. After he had started his wife called to him and told him to go back and take out some of the fish, that he could not make the trip with the load he had, but Mac told her he could cross all right. It was only a moment after this that he struck one of the terrible eddies, known as Round

CURES ALL SKIN TROUBLES

Sulphur the Accepted Remedy for a Hundred Years

Sulphur is one of the greatest remedies nature ever gave to man. Every physician knows it cures skin and blood troubles. HANCOCK'S LIQUID SULPHUR enables you to get the full benefit in most convenient form. Don't take sulphur tablets or wafers, or powdered sulphur in molasses. HANCOCK'S LIQUID SULPHUR is pleasant to take and perfect in its action. Druggists sell it.
A well known citizen of Danville, Pa., writes: "I have had an aggravated case of Eczema for over twenty-five years. I have used seven 50 cent bottles of the LIQUID, and one jar of your HANCOCK'S SULPHUR OINTMENT, and now I feel as though I had a brand new pair of hands. It has cured me and I am sure it will cure anyone if they persist in using HANCOCK'S LIQUID SULPHUR according to directions."
"BUTLER EDGAR."

Top, and his boat was capsized and he was sucked down, drowning.

Wednesday morning the body drifted into one of the fishing machines that is in operation on the river some distance from Williamston. The body was buried on the river bank.

FOR SALE—Old newspapers 50 cents per hundred, this office.

This man bought a supply of tobacco without acquainting himself with the distinctive taste of SCHNAPPS Tobacco, which has the cheering qualities that gratify his desire to chew, and at less expense than cheap tobacco.

SCHNAPPS has been advertised in this paper so that every chewer has had an opportunity to get acquainted with the facts and know that drugs are not used to produce the cheering quality found in the famous Piedmont country fine-cured tobacco, and that SCHNAPPS is what he ought to chew. Still there are chewers who accept other and cheaper tobaccos that do not give the same pleasure.
Some day they'll get a taste of the real Schnapps—they'll realize what enjoyment they've missed by not getting SCHNAPPS long ago—then they'll feel like kicking themselves.
SCHNAPPS is sold everywhere in 5 cent cuts, and 10 and 15 cent plugs. Be sure you get the genuine.

Brighter Prospects
Increase Your Yields Per Acre

We have many actual photographs of cotton fields on which no fertilizers were used and pictures of fields on which "other makes" of fertilizers were used. Results of these crops were dismal failures. There are much brighter prospects ahead for the progressive farmers of the South. Two and three bales to the acre are only ordinary yields where

Virginia-Carolina Fertilizers
are used with proper cultivation. Make your cotton mature early, and thus escape the boll weevil and other damaging insects. You can easily do this, as well as increase the number of bolls and their size on your plants, by plentifully using Virginia-Carolina Fertilizers. This method will tremendously increase your yields per acre. Don't be fooled into buying a substitute.
