Little Straight and Loyal B. Win First Money at Windsor

Wednesday was the day for the Windsor fall races, and quite a crowd from Martin County was present to witness the events. The day was fine, but the crowd at the track was small. Although the races were advertised to start promptly at one o'clock, it was nearly three o'clock when the first heat was trotted.
 The three minute class was filled entirely with Windsor horses. This race was not at all interesting, there was not a horse in the bunch that could hold Spot Cash a light, he winning in three straight heats. The purse was \$25.
 The 2:20 class trot or pace, was a little more interesting, to Martin County representatives, because two Martin County horses were in this race, Loyal B. and Midgett. Midgett's friends went to Windsor fully expecting that he would take first money in this race. They received an erroneous impression at the race here that Midgett could beat Loyal B. There was not a time in either of the three heats that Loyal B. was taxed. Polo was not even in it, he was strictly outclassed. Midgett had gotten in too fast company and could not hold the pace, he broke several times in the first heat. Loyal B. won in one, two, three order time 2:22, 2:23, 2:25, Midgett, second, Polo, third. Purse \$35.
 The 2:20, class, pace, was the race of the day. Little Straight's friends in the first heat were getting uneasy, and some very warm admirers were ready to go over to Windsor Maid. Little Straight broke two or three times in this heat, and Windsor Maid won by a good length, Little Straight second, Brigadier, third, Time, 2:22. The second heat was equally as exciting, but the confidence of the friends of Little Straight was restored, he winning this heat by more than a length, time, 2:23. The third heat was the fastest heat, time, 2:20. Little Straight first, Windsor Maid, second, Ada D., third. Brigadier fell out in this heat and was not driven any more. The last heat was driven in 2:25, Little Straight, first, Windsor Maid second, Ada D., third.
 Mr. Thomas Ely, the driver of Windsor Maid and Polo was seriously hurt Wednesday morning by being thrown from the sulky. He was going back to the stable when the bit broke, Windsor Maid bolted, throwing him against a brick wall, breaking his collar bone and otherwise injuring him. Mr. Ely is about sixty-five years old. While it is thought that Mr. Ely would have driven Polo better than he was driven, Rountree drove Windsor Maid as well as she was driven here.
 Only one kick can be made about the races: instead of beginning at one o'clock as advertised, it was nearly three. This made it very late for Martin County folks returning home, some of them left long before the races were over, so they could get through the swamp before dark.

Gastric Juice.
 There are two tides of secretion of the gastric juice—the psychic and the chemie. When food enters the stomach its impact on the gastric mucous membrane induces the chemical tide. The psychic flow of the gastric juice is controlled and brought into action by the brain centers; hence it is that things eaten with deliberation and relish, while the mouth waters, are much better disposed of by the processes of digestion than enormous quantities of more nutritious food swallowed in a mechanical manner.—New York Times.

Why Colds are Dangerous

Because you have contracted ordinary colds and recovered from them without treatment of any kind; do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germs that would not otherwise have found lodgment. It is the same with all infectious diseases Diphtheria, scarlet fever, measles and whooping cough are much more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade over a large part of the world. For sale by All Druggists and Dealers in Patent Medicine.

Why Caged Birds Die.

"So the canary's dead, eh?" said a dealer. "It was a fine bird, too—well worth the \$40 you paid me for it. But I don't wonder it died. You would keep it hanging near the ceiling. That is why so many birds die. They shouldn't be kept up high at all. Their cages should be on tables, not hooks. Up near the ceiling the air of a room is very bad, especially at night. Indeed, at night, if you burn oil or gas, the air is insupportable up there, and particularly in rooms where smoking goes on. You know how smoke, like all other impurities, mounts. It is bad to hang birds high. Why can't the world remember the old catch: "Birds hung high ever die."—New York Press.

The Opal is a wonderfully fascinating gem with its beautiful play of colors. It was highly prized by the ancients and thought to possess many virtues.
