## BEST MODELS STAY

GIRLS MUST WAIT UNTIL OCTOBER FOR NEW STYLES.

Scarcely a Dress Now Being Made That is Not Intended for Late Autumn Wear—Thin Stuffs Used.

It is pretty safe to assume that here will be no absolutely new fashions until October, so that the prettiest styles now offered for girls may be employed until then with perfect safety. In fact, there is scarcely a dress now being made that is not intended for quite late autumn use, all be fashionable leaning toward thin

er. Sometimes it is made by the cut, which is so done as to give a drawn-in look about the ankles. Again there will be very flat plaits stitched to a closely-fitting hip-yoke which comes far below the hips. Still again there are hip shirrings or bands put below the knees to keep the skirt breadths flat, these devices permitting more ease in walking than the narrow cuts allow. But so far I have avoided the use of any exaggerated style for misses, as the very narrow frocks are extremely odd looking, and anything that attracts attention is not the best taste for a young girl. At present there is a special demand for three models—the coat style for stout linens and serges, the tunic one for more elegant materials and some little gathered models that would be suitable for muslins, thin mercerized cottons, etc.

For the coat suit, which is so important a feature of the miss' wardrobe, there are beautiful double-width linens in the smart coarse weaves going at 50 cents a yard. Five yards will make a dress for a girl sixteen years old, the coat coming something below the hips and the skirt a plain gored model. The dress, then, if made at home, buttons and furnishings excepted, would cost only two dollars and a half. For the tunic dress, there is nothing prettier than voile or marquisette, and without a doubt such textiles will be worn in the house all winter long.

Our illustration shows the coat gown approved by fashion and good sense. The skirt adopts some of the growing scantness, but it is still wide enough for easy movement and good taste. The single-breasted coat fastens with three buttons, and has the plain back smartness demands, for the moment a coat has a middle seam at the back it cannot possibly have a new look.

For this dress linen, pongee or rajah silk would be excellent material for the present moment—deep blue linen, oyster white pongee or beige rajah, for the correct tone of either white or tan is a matter of importance. So when buying remember that a cream white is not quite so stylish as one which has a grayish tone and that any shade of tan is more effective if it is not too yellow. A gray linen would be immensely smart for the dress, this without any tinge of slate color, however, for the fashionable gray is rather on the tone of the summer sky at noonday—it is very pale, deliciously cool looking and very becoming.

A Toilet Novelty.  
A small silver novelty that makes a useful gift for a traveler—especially in summer—is a flat, plain silver case to hold the books of powder paper.

The case is double, clasping like a card case, and is made with an inner ring, beneath which the powder book covers are slipped.

Marked with a monogram on one side and date on the other, such a case makes a useful engagement present; unmarked it is suitable for a prize.

and those little odds and ends that have such a habit of accumulating upon a dressing-table.

For sale in a bazaar, too, these pin-cushions should prove most attractive, and they are easily and quickly prepared and very inexpensive to make.

## PRETTY TEA CUP PIN-CUSHION

Charming Little Japanese China Ornaments That Specially Lend Themselves to Making of Pin Cushions.

Among those charming little Japanese china ornaments—tea cups, sugar basins, vases, etc.—there are many that specially lend themselves to the making of pretty little pin-cushions, and they may be easily transformed into an article of this kind by merely filling them with cotton-wool and covering them in the upper part with velvet.

In our sketch may be seen a quaint little Japanese double-handled cup treated in this manner. The color of the velvet used for the cushion should be carefully chosen to harmonize with the color of the china, and it may be fastened in its place just inside the edge of the cup with a little seccotine.

Apart from the ordinary usefulness of a little pin-cushion of this nature, these little Japanese cups and saucers always make dainty ornaments, and look wonderfully pretty upon a dressing-table. Smart little bows of ribbon tied round the handles would go still further to make this article decorative, and the saucer forms a useful receptacle for hair-pins, buttons

# The ONLOOKER

By WILBUR D. NESBIT

The dusty road lay long and still  
To where it broke across the hill;  
The weary breeze would come and lift  
A puff of dust, and let it drift  
Against the haggard clover bloom  
That gave but shadows of perfume,  
And on the grass that was as gray  
As ever any dust that day.

The trees stood, thirsting, lank and lean,  
With foliage as shriveled as the hand  
Of some old man who scarce can stand  
Because of all the years he feels;  
The wagons moved with rattling wheels;  
The bees with angry hums sailed by,  
The birds chirped to the empty sky.

The twilight came without a breath  
Of wind, and was as still as death;  
And all the night the hot stars glowed  
While crickets clacked a crackle odd;  
The dawn woke white, and brought a sense  
Of the Sahara's heat intense,  
And the thin dogs lay roundabout  
With their long, red tongues lolling out.

Then suddenly a breeze laughed by  
And tossed a haze against the sky,  
And running, racing down the hill  
Came raindrops, with a subtle thrill  
As when some rippling dance-note surges  
Across the droning of a dirge,  
And brook and river, hill and plain  
Leaped up and sang: "The rain! The rain!"

## The Tussock Moth.

The tussock moth is so called because of its color, it being a fashionable shade of tussock.

It flutters about upon the scented breeze, gaily laying an egg hither and yon in the foliage. Then it retires from circulation.

After a time the eggs hatch out. If the moth had to sit on its eggs to hatch them it could not effect such a complete distribution. One mosquito, for instance, will lay 80,000 eggs in a day, but most of them will produce mosquitoes that immediately go to some summer resort. The offspring of the tussock moth is the tussock caterpillar, which is a slow traveler and a vegetarian. It is what entomologists call a "beautiful specimen," but its beauty is not even skin deep.

The caterpillar locates in some town where the city council does not see the need of gratifying the idle whims of nature lovers. One caterpillar is assigned to each leaf of the vines and trees that have been raised by hand. A few days later there is no necessity of spraying the foliage, for it isn't there.

The tussock moth is our leading anti-conservationist.

## In Bed Odor.

"And so," grumbled the rich uncle, "they say my money is tainted."  
"Yes, uncle," replied the diplomatic nephew, "but I always ask them what they can expect of a fortune amassed through a corner on hamburger cheese."

## Suggestion That Went Wrong.

"Now," said the kind employer to the new clerk who had come to work dressed in his riding togs, "I wouldn't wear that costume during business hours."  
"And very good taste you would show, sir," replied the new clerk. "Think how a man of your build would look in them."

## She Knew.

"You are so proud of your new hat and dress," growled the husband, "that it is a wonder to me you haven't left the price marks on them!"  
"What's the use?" gurgled the happy wife. "Every woman I know has priced them and given they up in despair."

## Mending Kid Gloves.

When a tiny hole appears in a black or white kid glove, instead of sewing it cover it on both sides with a bit of court plaster and press the two pieces closely together until fast bound. The hole will not again show itself, and the method is easier and better looking than sewing on kid.

# THE IMPORTANCE OF HEALTHY KIDNEYS.

Weak kidneys fail to remove poisons from the blood, and they are the cause of backache, headache, urinary troubles and dizzy spells. To insure good health keep the kidneys well. Doan's Kidney Pills remove all kidney ills.

Mrs. Sophia Hultquist, 10 W. 16th St., Jamestown, N. Y., says: "Doctor said I could not live six months. I was bloated to twice normal size and friends could not recognize me. I was perfectly helpless and wished for death. Rapid improvement took place after I began using Doan's Kidney Pills, and in six weeks I was cured."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

# Sign of Recovery.

"If when the devil is sick a monk he will be," said Rose Stahl sagely, "then the devil gets well in doubly quick time. Witness that young 'devil' with the ladies, my kid cousin. Last winter he was ill, so ill he didn't have any sense of humor left nor any sense either. I was staying at the same hotel, and when I went in to look after him he virtuously remarked that his room was no place for a 'Chorus Lady' and promptly shooed me out. (A few years ago I spanked that kid.) Then he got scared and sent for a doctor and the doctor sent for a trained nurse. For several days I got bulletins of his progress from the chambermaid. The fourth morning she set my mind completely at rest.

"Sure, ma'am," said Maggie, 'an' I think he do be gettin' along very well. The nurse was sittin' on his lap this mornin'!"

# KEEP BABY'S SKIN CLEAR

Few parents realize how many estimable lives have been embittered and social and business success prevented by serious skin affections which so often result from the neglect of minor eruptions in infancy and childhood. With but a little care and the use of the proper emollients, baby's skin and hair may be preserved, purified and beautified, minor eruptions prevented from becoming chronic and torturing, disfiguring rashes, itchings, irritations and chafings dispelled.

To this end, nothing is so pure, so sweet, so speedily effective as the constant use of Cuticura Soap, assisted, when necessary, by Cuticura Ointment. Send to Potter Drug & Chem. Corp., sole proprietors, Boston, for their free 32-page Cuticura Book, telling all about the care and treatment of the skin.
