HUMOR IN THESE VERDICTS

Quaint Ideas and Expressions Recorded as Having Been Rendered by Coroner's Juries.

Referring to a verdict recently given by a coroner's jury that death was "caused by the medical evidence," the British Medical Journal says: This verdict may be added to those cited in the report of the select com-mittee on death certification, where Dr. Ogle is quoted as saying: verdict came before me a little time ago which was this: "A man died from stone in the kidney, which stone he swallowed when laying on a gravel path in a state of drunkenness." That was given as a verdict. I thought some joke had been played, and I wrote down about it, and found it was "Child three months old, like this: found dead, but no evidence whether born alive"'" These novel judg-These novel judgments recall that an up-state newspaper not long ago spoke of taking a murdered man's "post-mortem" statement.

BEST, LIKE MOST THINGS, IS NOT CHEAPEST.

Working Knowledge of Kinds and Prices Essential to Woman Who Would Make Best of Her Outlay.

There are few women, of whatever age or condition, who do not feel pleasure in the sight of a goodly store of lustrous damask, and to acquire such a store, to use herself and then to dower her daughters, is one of the dear objects of all mothers'

Ireland is the great home of linen manufacture. Indeed, it is said a cer tain firm in Belfast is the only one in the world still turning out genuine grass-bleached damasks. Irish linen is the most expensive at first cost, but probably the most inexpensive in the long run, as there is practically no wear out to the splendid Irish cloth. It comes back from the laundering (if properly done) more glossy and beautiful with each washing. The prices of tablecloths of Irish linen range from three dollars up, depending first upon the fineness and then upon the size of the cloth.

French, German and Scotch linens follow after the Irish in order. French linens are very fine and have an exquisite finish. German and Scotch linen is said to be bleached by chemicals, which probably affects its wearing qualities. On this account many housekeepers prefer to buy their cheaper linens unbleached and bleach them at home. These cloths wear well, and it is an indisputable economy to use cheaper linens every day, especially when there are children, so as to save the finer cloths and napkins.

Pattern cloths for round tables are made in beautiful designs, with round border to suit the shape of the It should be remembered that the quality of damask does not depend upon the weight of the thread, but sather upon the fineness of the weaving. Accordingly, a loosely woven fabric is to be avoided. It will not only not wear so well, but will never look well as those where the threads are smooth and connect.

Most of the economy of table linen depends upon the care that is given it. If stains are allowed to go untreated, and thin places undarned, spots and holes will put an end to its usefulness. Most stains in table linen are quite easily removed by pouring boiling water through them. Rust stains will yield to applications of salt and elle water, while a few minutes' at yards silk for lining coat.

week will serve to trengthen the worn parts of old

VERY CHIC WALKING COSTUME

Mulberry Colored Cloth After This Design Makes Very Attractive Dress.

In mulberry-colored cloth this would look exceedingly well. The smart skirt has a group of plaits at each side, which are well pressed and taped; the back and front are made in panels. which are connected at sides by narrow straps cut in with them, which are fastened by buckles.

The semi-fitting coat has the right

BOTH PRETTY AND USEFUL APRON FOR EMBROIDERERS

Scissors-Holder and Pincushion That Can Easily Be Made by Any Woman.

An ornamental and useful little article for hanging upon the wall by the side of the dressing table is shown in the accompanying sketch, in the shape of a scissors-holder and pin-

cardboard smoothly covered with silk.

Between these two pieces a layer of cotton wool is p'aced, and the sides then bound together with silk ribbon. Prior to covering the cardboard, how ever, the little floral design, suggested in the sketch, should be worked upon the silk, and the strap sewn in its

The pins are inserted in the edge of the cushion in the manner illustrated, and there is a loop of ribbon with a rosette bow at the top attached to either side, by which the cushion may be suspended from a nail in the wall

For Paper Patterns.

Get a large Japanese lantern, hang et in the sewing room or any other convenient place and use it to hold light paper patterns. A lantern is the darns are more comfortable to durable and will hold a great many wear, as they conform to the shape of

Simple Article is Made of Lawn or Dimity, Turned Up and Featherstitched Into Pockets.

A very simple apron for embroiderers is made of a big square of lawn or dimity, turned up about a third of its length and featherstitched into four pockets. Three of these hold dery pieces; the fourth is again It is made of two circular pieces of featherstitched into five divisions, each for a separate color of silk. The hem on these pockets is lined with canton flannel before being turned down and featherstitched, and is used as a needle case. The rest of the goods is hemmed all around and provided with ribbon drawing strings, so that it can be worn as an apron.

This is especially pretty in some light color, such as pink, with deeper pink embroidery and ribbons, or in white with some such dainty shade as baby blue or nile green. The silk and ribbon should both be washable. so that the whole apron can go in the tub when necessary. It is a pretty gift to an embroiderer, and one that will come in handy during afternoon neighborhood calls, or in winter eve nings spent at home.

Enter the Beauty Spot.

It is coming, they say. No longer will its fascinations be confined to fancy dress balls and the

It is not the artificial-looking bit of court plaster which is about to descend upon us.

It is the genuine beauty spot, the iny brown mole, which is promised its innings for next winter.

If you haven't one, and few people have, in the right place, paint it there. Several actresses have already done so, placing the tiny blemish where it will best enhance the charms of a pair of beautiful eyes, a faultless curve of the cheek or a lovely mouth.

It is surprising the effect which this innocent little bit of make-up, if artistically performed, has in bringing out good points of the face.

To Darn Stockings.

An ingenious woman darns all of her stockings over shoe trees. She says that as the stockings are held in the shapes in which they are worn, the foot.

FOR TWO HUNDRED LEGHORNS

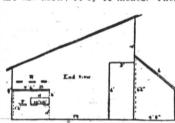

Structure Shown in Illustration Prov ed Entirely Satisfactory During Severe Winter.

During the severe weather of last winter the house shown in the illustration gave us entire satisfaction writes F. T. Tiffany in Country Gentle In this house we had 185 pullets and 15 cockerels, and had no trouble with colds as was the case with ar open-front house.

This house is 30 feet long, 14 feet wide, 10 feet high in front, and 5 feet high in the rear; on the front side of the house, facing south, are two openings 3 by 4 feet 6 inches each; these openings are, covered on the outside with inch mesh wire to keep out the sparrows; these openings have frames on the inside covered with muslin which on cold nights is placed over the openings

The addition in the front is 12 fee long by 4 feet 8 inches wide, and is 6 feet 6 inches high where it joins the building, and 3 feet high at the lower side. The roof of this comprises hot-bed sash 3 feet wide by 6 feet long. This is used as a dusting room and the roof furnishes light for the rest of the building. These sash are made so they will slide down in hot weather or when we wish to put in new dust. There are also in front two openings 18 inches high to let the fowls out; these openings have sliding doors on the inside.

On one end of the building we have a door 3 by 6 feet for entrance. All weather boarding is white pine Ger man siding, except on the north side, boarded first with barn boards and then with siding over it The roof is covered with shingles Inside the house on the north side is the roosting place; the dropping board is 21/2 feet from the floor and is 41/4 feet wide and runs the length of the building. Under the dropping board are the nestr, 14 by 16 inches. These

Practical Poultry House. R, Roosts; D, Dropping Board; N, Nests P, Perch.

rest on a platform composed of two fence boards about 4 inches apart and can be taken out separately to be cleaned. In the rear of the nests is a board 4 inches wide for the hens to light on to enter the nests. The nests are 15 inches from the floor; in front of the nests is a musiin curtain which hangs within 9 inches of the floor; this makes the nests secluded. roost poles are about 6 inches above the dropping board and are one foot part and run the length of the build

This house can be built for less than \$2 per fowl.

PROFIT IN MIXED POULTRY

Most Money Is Made Where Chickens Are Kept as Adjunct to Other General Farm Crops.

There is no doubt but that the great est profit is made where poultry is kept as an adjunct to the other farm crops. On the general farm the feed item and the labor item, as well as the item of land, are of smaller account than on larger poultry farms. To the farmer who is willing to give as much attention to the poultry as he does to any other part of the farm operations there is a good profit to be made with very little expenditure of time and

Plymouth Rock Cockrel.

money. Wherever it is possible the colony house system is strongly recom mended for the general farm. It has the advantage of being able to move poultry to any part of the farm, and many times a corn or stubble field for the fowls to range over would mean a great saving in the feed bill. The drippings would also help to fertilize the land, as they are richer than that of any other domestic animal. Poultry kept in this way and receiving the proper attention should prove to be one of the best paying branches of the

Dry Your Clothes on a Wet Washday With a New Perfection Oil Heater

When clothes can't be hung outside, and must be dried in a room or cellar, the New Perfection Oil Heater quickly does the work of sun and air. You can hang up the wet clothes, light your Perfection Oil Heater, open the damper top, and the heat rises and quickly dries the clothes.

Do not put off washing to await a sunny day in order to avoid mildew. Dry your washing any day with hot air from a

Absolutely smokeless and odorless

It gives just as much heat as you desire. It is safe, odorless

It has an automatic-locking flame spreader, which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back, so the wick can be quickly cleaned. Burner body or gallery cannot become wedged, because of a new device in construction, and can always be easily unscrewed for rewicking.

An indicator shows the amount of oil in the font. Filler-cap does not need to be screwed down, but is put in like a cork in a bottle, and is attached to the font by a chain. Finished in japan or nickel, strong and durable, well-made, built for service and yet light and ornamental. It has a cool handle and a damper top.
