Buick

Much has been said by Automobile Manufacturers about the greatness of their factories, but few people realize that the greatest of them all is the **BUICK PLANT**.
EVERY BUICK is a BUICK THROUGH and THROUGH.
Practically every part is made in this great BUICK PLANT. The BUICK organization is a unit which represents the highest degree of efficiency in the Motor Car production. So perfect is the harmony of all operating parts, that the BUICK is one of the most Silent-running Cars made.
The BUICK motor is famous the world over for its marvelous efficiency, simplicity of Construction and Mechanical Perfection. The BUICK valve in the head Construction does away with the pockets over the intake and exhaust valves found in the L and T head type, resulting in a gain of 20 per cent more power and greater fuel economy from the same size Cylinders.
All BUICK motors develop more power for their dimensions than any other ever designed for Automobiles.
The position of honor at the Madison Square Garden Show allotted according to the value of the annual output, has been awarded this year, as in previous years, to the BUICK.
