

WHITE PLAGUE LESS DEADLY

Decrease in Death Rate From Tuberculosis Means Saving of 27,000 Lives in Ten Years.

In the decade from 1901 to 1910, the death rate from tuberculosis in the United States declined from 196.9 for each 100,000 persons living to 160.3, a decrease of 18.7 per cent, while the general death rate, including all causes of death, declined only one-half as fast, or at the rate of 9.7 per cent, from 1655.0 to 1495.8, according to figures given out by the National Association for the Study and Prevention of Tuberculosis. The figures are based on data abstracted from the reports of the United States Bureau of the Census, and cover the registration area in this country. According to the statement, the tuberculosis death rate has declined steadily since 1904, when it was 201.6. On the other hand, the general death rate shows a fluctuation downward in general trend, but not as steady as the tuberculosis rate. The decline in the tuberculosis death rate in the last ten years means a saving of 27,000 lives at the present time.

The Suffragette's Answer.
"And where, by fellow citizens," appealed the political speaker, "can we find an instrument so fit, so delicate, so adjustable, and at the same time so unassuming and popular that it will unlock every department of state for the benefit of its readers?"
"The hairpin!" shrieked an enthusiastic suffragette in the audience.—Judge.

A Confession.
Started by convincing evidence that they were the victims of serious kidney and bladder trouble, numbers of prominent people confess they have found relief by using KURIN Kidney and Bladder Pills. For sale by all medicine dealers at 25c. Burwell & Dunn Co., Mfrs., Charlotte, N. C.

A "Cuss" Word.
"And why," asks the minister of his deacon, with whom he is playing golf, "do you exclaim 'Gatun' every time you make a poor drive or miss the ball?"

"Well, you're along," explains the deacon, "and 'Gatun' is about the biggest dam I know of."

AFTER THE DOCTOR FAILED.
Even the most stubborn cases of malaria yield to Elixir Babek.
"In the summer of 1896, I contracted the disease known as Malaria. After a year's fruitless treatment by a prominent Washington physician, I was entirely cured by your Elixir Babek."—Brasie O'Hagan, Troop E, 4th U. S. Cav. It is equally good for bilious disorders. Elixir Babek, 50 cents, all drugists, or Klocowski & Co., Washington, D. C.

Later the Better.
Hubby—Understand me, madam, your extravagance will have to cease, sooner or later.
Young Wife—Very well. We'll make it later.

If You Are a Trifle Sensitive
About the size of your shoes, you can wear a size smaller by shaking Allen's Foot-Ease, the antiseptic powder, into them. Just the thing for Dancing Parties and for Breaking In New Shoes. Sample Free. Address Allen S. Olmsted, Le Roy, N. Y.

A girl thinks a young man who spends money freely is the whole thing—but if she marries him and finds he has spent it all she changes her mind.

The Paxton Toilet Co. of Boston, Mass., will send a large trial box of Paxline Antiseptic, a delightful cleansing and germicidal toilet preparation, to any woman, free, upon request.

There is very little fighting done in the world, considering the number of men who go around with chips on their shoulders.

FOR COLDS AND GRIP
Hicks' CAPSICUM is the best remedy—relieves the aching and feverishness—cures the cold and restores normal conditions. It's liquid—effects immediately. 10c, 25c, and 50c. At drug stores.

There may be crumbs of comfort in knowing that some people cast their bread upon the water.

Beware of Spring's sudden changes; keep Garfield Tea at hand. Drink hot on retiring.

PENNANT-WINNING PLAYS

By IRWIN M. HOWE, Official Statistician of the American League

JIMMY McALEER'S PART IN WINNING CLEVELAND'S ONLY WORLD'S PENNANT

IT'S a far cry from player to major league magnate, but that is the leap James R. McAleer has taken in the last dozen years. In 1895 he was "Gentleman Jim" on the rough and ready Cleveland Spiders, one of the formidable clubs of that day. Jimmy McAleer was a brilliant, hustling fielder, probably the fastest outfielder of that decade. He could knock down a bully in the baseball ranks, sprint to the sign board for a hot liner or execute a pennant-winning play with a dash and an enthusiasm that made him a shining success. The same qualities have made him one of the "big eight" in the American league.

McAleer starred as one of the bright lights of the 1895 series for the Temple cup and helped bring the only world's pennant to Cleveland in its history. Without the brilliant fielding of McAleer the Orioles would have won the first game of that series. Baltimore in that event probably would have taken the world's championship.

Any club to defeat the Orioles was compelled to play wonderful baseball. Hanlon's great machine had won the National league championship, but in doing so had exhausted its strength as in the previous year, owing to the grueling battle for the league pennant.

The opening scene for the world's pennant struggle was set at Cleveland and the battle fell on October 2. Cy Young, the pitching hero of the series, was rounding out one of the great seasons of his eventful career. He was the slab choice to stop the heavy-hitting brigade from Baltimore.

Although others contributed to Young's support in this important game, without the great catch of McAleer in the sixth inning and his timely bunt in the ninth, the Orioles would have taken this contest and probably the pennant.

It was a struggle of sharp hitting and clever fielding. The Orioles were making their best stand for the Temple cup and that meant they were formidable at every stage. Cleveland led 2 to 1 up to the eighth, but the real crisis had passed in the sixth inning. Baltimore's trio of awful swatsmen came up in that round and the game, as events proved, hinged on the play of McAleer.

John J. McGraw dropped a hit back of third base and Willie Keeler bunted him to second. Hughie Jennings came up in the pinch and a wave of unrest swept over the Cleveland crowd. They had seen this aggressive player "clean up" on so many occasions that they feared for the result. The present leader of the Tigers was having one of his best seasons as a batsman. He had hit near the 400 mark in the National league season. The fears of the crowd were well grounded. The heavy hitting Oriole shortstop met one of Cy Young's curves with a crash that seemed to doom the Spiders to impending disaster.

McAleer divined instantly what was coming. He was away almost with the crack of the hickory. Away back into deep center he sailed with the speed of a deer, pulled down the hit, stopped the rally and saved the game.

The Orioles, battling to the last ditch, tied up the score in the eighth and went ahead in the ninth, but the Spiders scored the winning run in the last half of the ninth, when McAleer bunted, enabling Childs to score from third on Zimmer's infield hit.

Jimmy McAleer made the greatest play of his life when he bunted stock in the Boston club, one of the best paying franchises in baseball, but his next best plays were his timely catch and opportune bunt in another decade, which helped place him among the game's greatest stars.

By IRWIN M. HOWE, Official Statistician of the American League

MORDECAI BROWN'S PENNANT-WINNING FIELDING FEAT

LONG after Mordecai's wonderful right arm of bone and sinew has paid the toll of age—seasons after the three-fingered marvel of the diamond has pitched his last baseball attired as a major leaguer, will the memory of his startling play of brain and skill one bright October day at Detroit cling to those who were fortunate enough to see the exhibition.

The Chicago Cubs with their matchless machine intact had beaten the Tigers twice and George Mullin's great pitching gave the jungle fighters their only victory. Eliminate the wonderful play of Brown and Detroit might have won the fourth game, even up the series and taken the world's championship of 1908.

Singularly enough Brown's pivotal play was not a pitching feat, although it helped win his own game, but a fielding achievement in which quick thinking and clever maneuvering were the all important factors.

Brown's great pitching on that day was effective enough to win the game with good fielding. Tinker's fielding was spectacular all the way through, but Brown's play coming at the danger point, bordered on the marvelous. It was pronounced the greatest play of the world's series of 1908.

Had "Brownie" failed to think in that crisis, Cobb's great speed and perfect bunt would have filled the bases for Detroit and the series might have stood two all. As it was the Cubs won, practically clinching their grip on a second world's bunting.

Charley O'Leary brought a gleam of hope to the Tiger fans in the fourth inning when he batted a single to left. "Wahoo Sam" Crawford drove the crowd wild with cheering when he smashed out a drive to left, O'Leary halting at second. Those desperate fans knew the great Cobb was yet to come to bat. They hoped for a home run that would put Detroit in the lead.

Brown was fully alive to the situation. He flashed a signal along the line for Harry Steinfield to be ready for a surprise at third. The Cub pitcher's brain was at work to outwit the greatest-batting player of the age. He figured Cobb would bunt and bunt he did. It was laid down perfectly.

The startled fans saw the form of Brown crouch close to the ground, lunge madly at the ball, whirl and fire the sphere to Steinfield. The throw came half a step ahead of O'Leary rushing down on third. The crowd was dazzled and Crawford at second so bewildered that Johnny Kling relayed the ball to Tinker, practically completing a double play that saved the day for the Cubs and gave Chance another pennant.

Mordecai Brown.

My Worst Blunder

FAMOUS "BONEHEAD" PLAYS ON MAJOR LEAGUE DIAMONDS

Explained by Leading Baseball Players to HUGH S. FULLERTON

By ED. WALSH.

Premier Pitcher Chicago White Sox, Who is Regarded by Many as the Greatest Pitcher the Game Has Ever Known.

There isn't any doubt in my mind as to the worst mistake I ever made in a ball game. Of course a fellow makes a lot of them. They are mistakes if they go wrong, and brainy plays if they go right, so it is all in the day's work. A pitcher who is forced to keep guessing all the time is going to be outguessed sometimes, and the one who guesses right oftenest is the best. But this one stung me. I felt like a fellow who has been double-crossed.

It was in a game at Boston, a close game that we had won by one run. I always had been very effective against Boston, and even more effective against Jake Stahl than against any of the others. You know how it is—sometimes a good hitter has something on a good pitcher, and sometimes a pitcher has something on the best of batters. Jake and I used to laugh at each other, for it seemed to be his bad luck to come up to bat in the pinches against me, just when Boston needed a hit, and he struck out so often we got to kidding

each other. The laugh was all on my side. One summer, the season before this happened, I think Jake struck out to end the game half a dozen times; and after the season was over I pitched part of an exhibition game against him down east, and it happened he came up in the ninth with a chance to win and struck out again. Of course I kidded him about it, and kept it up all summer, thinking it would make him more anxious to hit—so anxious that he would be easier still.

Late in the summer we got together in the game I'm telling about. We had a lead of one run, two men were on the bases (first and second), no one out, and I was a bit wild. Maybe my idea that Stahl would swing at wide ones made me wild. It looked a thousand to one that he would try to sacrifice, but the first ball was too wide. He let it go. I slipped the next one outside and he let that go, too. Then I guessed he might take a swing at the next one and I put everything on the splitter and dropped it over. I thought it was over, but the umpire thought not—and there were three balls and no strikes. I saw Fred Lake, who was managing the team then, motioning to Stahl, and watched closely while I was getting ready to pitch. Stahl stood there with his toes dug in, yelling for me to put it over and telling me where he would knock it. Now it was a thousand to one that, with men on first and second, none out, and three balls and no strikes, no ball player would hit that ball. But even then I didn't forget that he might. The thing that convinced me he wouldn't was the way he acted. Whenever a batter has the pitcher in a hole and pretends he is going to hit it is a million to one he isn't going to. I shot a fast one straight over. Stahl hit that ball and I heard it sing over my head, and before I could turn around it was rattling around up in the center field bleachers and the game was over. Stahl had the laugh on me, and he didn't forget to laugh, either.

Ed. Walsh.

POULTRY

FIGHT ON TURKEY PARASITES

Youngsters Must Be Protected From Excessive Heat and Dampness, Says Government Bulletin.

No kind of young poultry is so susceptible to the effects of unfavorable conditions as the young turkey. They must be carefully protected from the attacks of parasites, and from excessive heat and dampness, says a government bulletin, until they have gained sufficient strength and size to wander away with the parent turkeys and care for themselves on the range.

The chief danger from lice and mites attacks to the poult is directly after the poult is hatched, but the best remedy is to deal with the hen before the young are hatched. The plumage of the hen should be dusted with insect powder, and close down to the skin from head to hock joint, being careful not to get it into the eyes. This should be done at least twice a week until two or three days before hatching.

The most careful attentions should be given to this. Never use lime or sulphur for this purpose. Nothing is better than some insect powder, if it does not contain ingredients that are injurious to the eyes.

It may often occur, however, that the hen will not have been properly treated, and also the lice and mites will be found on the young, and in order that the poult may live and thrive, they must be freed of these enemies. As soon as the young are ready to leave the nest they must be examined carefully for lice, which may be on the top of the head, under the throat or about the wings or vent. Some of them are gray in color and difficult to see.

They may be destroyed by the use of sweet oil, rubbing a small amount upon the head and throat; insect powder is sufficient for the other parts of the body. It is very important that only a small amount of the sweet oil be used, as too much is injurious. Kerosene should never be used to destroy parasites.

ODD WAY FOR DATING EGGS

Rubber Stamp Held in Place in Palm of Hand Performs the Operation—Type Removable.

A Minnesota man has patented an ingenious device for putting the date on eggs. It consists of a rubber stamp of removable type which fits

Dating Eggs.

into apertures in the palm of a glove-like cover which is strapped around palm of the hand. As each egg is picked out of the nest the date is imprinted upon it, and there is no necessity to going all over the day's "crop" after they have been collected. The type, of course, is inked from time to time.

Remedy for Diarrhoea.

When simple remedies fail to correct diarrhoea in birds, give the following: Subnitrate of bismuth, one to four grains twice each day, or pulverized cinnamon bark, two grains twice each day. The soft feed given the bird should be dry or as nearly dry as possible. In case the trouble is checked too abruptly, give from 20 to 30 grains of salts in a tablespoonful of water. One or two grains of calomel in soft water is also a good corrective.

POULTRY NOTES

Feed dry feeds—no mashes. For the first feeds use plenty of dry oatmeal.

Now is the best time to try your breeding stock.

Chills, wet food and lack of sunshine are the main causes of bowel trouble in chicks.

Where the dropping boards are made of matched lumber the job of cleaning them is easier.

This is a good time to put a square of tar paper in the bottom of each nest box for the benefit of lice.

If a new poultry house is to be built this spring see if there isn't a sandy spot handy on which to locate it.

If all the chickens and full-grown hens run together, the stronger chickens will get most of the feed and keep the others poor.

In operating brooders remember that uniform heat should always be maintained. It is better to have a little too much heat than too little.

WOMEN SHOULD BE PROTECTED

Against So Many Surgical Operations. How Mrs. Bethune and Mrs. Moore Escaped.

Sikeston, Mo.—"For seven years I suffered everything. I was in bed for four or five days at a time every month, and so weak I could hardly walk. I cramped and had backache and headache, and was so nervous and weak that I dreaded to see anyone or have anyone move in the room. The doctors gave me medicine to ease me at those times, and said that I ought to have an operation. I would not listen to that, and when a friend of my husband told him about Lydia E. Pinkham's Vegetable Compound and what it had done for his wife, I was willing to take it. Now I look the picture of health and feel like a kid, too. I can do my own housework, hoe my garden, and milk a cow. I can entertain company and enjoy them. I can visit when I choose, and walk as far as any ordinary woman, any day in the month. I wish I could talk to every suffering woman and girl."—Mrs. DEMA BETHUNE, Sikeston, Mo.

Murrayville, Ill.—"I have taken Lydia E. Pinkham's Vegetable Compound for a very bad case of female trouble and it made me a well woman. My health was all broken down, the doctors said I must have an operation, and I was ready to go to the hospital, but I decided I so that I began taking your Compound. I got along so well that I gave up the doctors and was saved from the operation."—Mrs. CHARLES MOORE, R. R. No. 8, Murrayville, Ill.

DAISY FLY KILLER placed anywhere, attracts and kills all flies. Not clean on mental, convenient, cheap. Lasts all season. Made of metal, can't spill or tip over; will not soil or injure anything.
