Woman's Place

Woman's place may be the ho but, judging from recent statistics, she seems to have deliberately ignored that fact, for there are 239,077 stenographers, 327,635 teachers and profes sors, 481,169 in various trades, 770,055 engaged in agricultural pursuits, 7,-255 physicians and surgeons, 7,295 clergy "men," 2,193 journalists, 1,037 designers, darughtsmen and archi-tects. 1,010 lawyers and 429,497 wom-en in various professions.—Baltimore

DEEP CRACKS ON JOINTS

P. O. Box 378, El Paso, Texas .- "My trouble began December, 1911. It commenced on me by causing a scurf-like skin and my toe joints, finger joints and lips commenced to crack and split open. My finger cracks would bleed all day long; the cracks were very deep and my thumb seemed to be cracked to the bone. My hands were so bad that I had to sleep with gloves on. The cracks in my lips would bleed often during the day and used to put adhesive plaster across them to try to keep them closed. My toes would bleed, and I would find blood in my socks when the day's work was done. The skin around the cracks was red and inflamed. I wore shoes one size too large on account of my feet being so sore. I used to be come frantic with pain at times. My hands and feet used to smart.

'I suffered agony for four months. I went to town and got some Cuticura Soap and Ointment. From the time I commenced with the Cuticura Soap and/Ointment until completely cured (Signed) was just nineteen days." Jack Harrison, Nov. 19, 1912.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address postcard "Cuticura, Dept. L, Boston."-Adv.

ONE OF UNCLE SAM'S CUTTERS

THREE months' game of "tag" Captain Johnston is of the opinion between vessels of the United that the quantity of ice brought down States revenue cutter service in the spring is in direct proportion to and the icebergs of the North the severity of the winter preceding. Atlantic steamship lanes. The severity of the winters in the has just been brought to an north Atlantic states, he says, depends end, has resulted in contributions of upon the prevalence of strong north great value to the mariner's store of winds having their origin on the Labknowledge about ice movements and rador coast. Similarly it is these same winds which start southward the great their dangers to the great fleet constantly passing between Europe and masses of ice broken off from glaclers America. The ice patrol itself was a which appear in the steamship tracks direct result of the tremendous shock as icebergs. Therefore the ice danger suffered by both Europe and America in the steamship lanes is always greatin the loss of the giant liner Titanic est after the most severe winters and a year ago last April, when more than less as the preceding winter has been 1,600 persons were drowned when that mild. vessel collided with an iceberg in the

Ground on Banks.

Many of the icebergs in the south -ward drift become grounded on the Grand Banks and do not constitute any serious menace to the transatlantic liners. It is those which continue south parallel to and beyond the banks which threaten the safety of the ocean steamers; and it was to these that the revenue cutter patrols paid the most attention. Captain Johnston said that the largest berg that was encountered was about 400 feet long, 300 feet wide, 70 feet high out of water. The smallest ice which properly could be called a berg was 225 feet long, 100 feet wide and 35 feet out of water.

Captain Johnston estimated the rate of deterioration of icebergs floating in the Gulf stream as about 5 per cent. a day. He saw many melting so rapidly that waterfalls were pouring down from their sides while others in the advanced stages of dissolution turned over daily as rapid melting shifted the center of gravity. Sometimes icebergs were found literally covered with sea birds. Of the score of varieties of sea birds found on or near icebergs Cap-

The mode of procedure in the ice patain Johnston concludes that the prestrol maintained by the Seneca and the ence of none but the murre, a bird Miami was for the two vessels to take turns in scouring the ocean for ice in common in northern latitudes, can be

People of State.

Washington .- Messrs. Davis and Davis, Washington patent attorneys, report the grant to Jerry M. Hassell, Warsaw, of a patent on a logging-car.

Oxford .- Mrs. Kate Hays Fleming, one of Oxford's most accomplished teachers, was appointed by Gov. Craig a delegate to the Fourth International Congress on school hygiene, now being held in Buffalo, N. Y.

Warrenton .-- This county is stirred over the proposition of a bond issue of \$100,000 for good roads. The question will be decided at the polls Sep tember 16 and both sides are hard at work.

Salisbury .- The hookworm campaign, which has been under way in Rowan county for six weeks, was concluded recently. The work was done in a thorough manner by Dr. G. F. Leonard and Mr. H. E. Jenkins.

Fairmont .- Several days ago the Robeson county veterans held 'a reunion here and a great crowd was in attendance. There were 85 veter-ans present, 18 of whom were over 75 years old. Mr. L. R. Varser, of Lumberton, was the orator of the day. Concord .-- Supt. A. S. Webb, of the city schools has notified the teachers that Septtember 22 is the opening day. He has instructed the teachers to meet their pupils on Friday, Septtember 19, for the purpose of giving

out book lists and assigning lessons for Monday's work. Charlotte-That Willie Stevens was justified in slaying George Smith on May 25th was the decision of the jury sitting on the case in the superior court after a deliberation of an hour and forty minutes. The decision was announced after court had been adjourned nearly two hours. The trial continued through two days.

Dunn,-At a meeting of a commit tee from the chamber of commerce selected to handle the question of a union depot for Dunn and several of the leading business men of the town it was decided to accept the proposition made by the Atlantic Coast Line and the Durham & Southern to build a modern station at the junction of the two roads.

Henderson .--- From present indications the extensive preparations now being made will result in greatly increasing the tobacco interests of Henderson and a part of this increase will be shown this season. The Farm ers' Sales Warehouse, nearing completion, is the largest structure of the kind erected in the city since it be-

came a tobacco market. Asheville .-- The dream of a "great white way" for Asheville appears to be materializing, workmen having al ready started the task of installing the light standards on Patton Avenue work of placing the standards The will be completed within the next week or ten days and then the "juice' will be turned on on that street as well as North and South Pack square Durham .--- Mrs. J. E. Keith, of the

Creedmore section of Granville county, met a tragic death several days ago, when she was killed in the elewator of the Trust building. Mrs. Keith and her daughter were on the car, and the body of the elder lady was fearfully mangled, death result ing instantly. The daughter was a witness to the fearful death of her mother.

Sallsbury .-- A narrow escape from serious injury and perhaps death, was experienced recently near Salisbury mangle beets or cabbage heads by Mr. Reed Rusher, Miss Annie

As to the age limit of profitable egg

production there are many exceptions

to this rule. Some hens are never

profitable egg producers, while others

may be profitable for years. I have a

cer

rate and direction of their movements It is this secondary phase of the patrol that yielded the general observations of greatest permanent value to maritime interests

It was found that the icebergs were brought south along the coast of Newfoundland and the Grand Banks by what is known as the Labrador cur rent. The southerly drift was found to vary from practically nothing to as high as 32 miles a day, depending upon wind and tide in its fluctuations. At the junction of the Labrador current, accelerated by the flow from the Gulf of St. Lawrence, and the north ward moving Gulf stream from the Gulf of Mexico the direction of the drift of icebergs is changed from southerly to north and east. The Gulf stream is more powerful than the Labrador current and dominates it, taking along in its course whatever ice may be brought into it. This change usually occurs in April and May, and those months become then the period of greatest danger to transatlantic liners from ice. The tracks of the liner hardly touch the Labrador current, but do lie along the path of the Gulf

stream. The area of the ice danger is at the same time restricted, because ergs coming into the Gulf stream do not last long in the warm water of that current.

the waters bounded by the fiftieth and safely regarded as an indication of ice

Perhaps Captain Johnston's most valuable contribution is that referring limits the animal dashad down a high to the visibility and means of detecting the presence of ice and icebergs. After three months of repeated observations and experiments, together with the results of his experience in other arctic regions, Captain Johnston concludes that there is no certain method of detecting, the presence of ice other than that of a sharp lookout; that in fog, or especially dark nights, it is absolutely incumbent upon the commander of any fast liner to run very slowly and keep an extra vigilant watch

For the "Brass Wedding."

That wholly modern institution, the brass wedding, is popular because the bride and bridegroom thus celebrating feel that they are not hinting for costly gifts when they send invitations to their friends to rejoice with them. If the "bride" is literary, she will like to have something for her desk-a stationery rack, a memorandum pad with a pencil attached to a spiral spring, a desk blotter, a string box, a book rack or book ends. Don't forget that the "bridegroom," if he is a smoker, will like a brass lamp of antique appearance, or a cigar pedestal with a dish for the ashes flaring into grooves for the stubs of his weeds

Both "bride" and "bridegroom" will appreciate a brass serving tray, a chafing dish with a match box holder attached, a tea caddy, candle shades, bridge score pads or an egg dish holder.
