

Calomel Users! Listen To Me! I Guarantee Dodson's Liver Tone

Your druggist gives back your money if it doesn't
liven your liver and bowels and straighten
you up without making you sick.

Ugh! Calomel makes you sick. It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work.

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight.

Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a

spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it cannot salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

Relieve Your Rheumatism For 25c.

NR does it by improving digestion, assimilation and elimination—the logical way.

NR Today—Relief or No Pay

There are three vital processes of human existence—the digestion of food, the extraction of nourishment from it and the elimination of the waste.

Let anything interfere with these processes—let them be interrupted or improperly carried on, and sickness of some kind follows.

For digestion and assimilation means failure to derive full nourishment from food and that in turn often means impoverished blood, weakness, anemia, etc. Poor elimination means an accumulation of waste matter which poisons the body, lowers vitality, decreases the power of resistance to disease and leads to the development of many serious ills.

Rheumatism—due to some interference with the process of elimination, failure to get rid of certain body poisons—cannot be expected to yield to any medicine that fails to correct the condition responsible for it. Could any reasonable person expect to rid himself of rheumatic pain as long as

rheumatic poison is allowed to remain in the body.

Think of this. It explains the success of Nature's Remedy (NR Tablets) in so many cases where other medicines have failed. Thousands are using NR Tablets every day and getting relief. Why pay five or ten times as much for uncertain things? A 25c box of Nature's Remedy (NR Tablets), containing enough to last twenty-five days—must help you, must give you prompt relief and satisfactory benefit or cost you nothing.

And Nature's Remedy is not only for the relief of rheumatism. It improves digestion, tones the liver, regulates kidney and bowel action, improves the blood and cleanses the whole system. You'll feel like a new person when you've taken NR Tablets a week. You've tried the expensive medicines and doctors, now make the real test. You'll get results this time. Nature's Remedy (NR Tablets) is sold, guaranteed and recommended by your druggist.

You Can Now Eat Your Favorite Food Without Any Fear

Kramer Says: "EATONIC" Rids Weak Stomachs of Acids, Gas, Heartburn, Food Repeating and Stomach Miseries

What miserable feelings are caused by an upset stomach! That dull, heavy, "bloated" sensation that follows a full meal, robs good living of half its pleasures. Is there any way out for you sufferers with stomach weakness?

Yes; H. L. Kramer, the man who originated Cascarets, has found a sure, quick, relief for indigestion, dyspepsia, "sour stomach," heart-burn, formation of painful gases, "bloating," etc., etc. He calls his stomach relief EATONIC, and it certainly is making a wonderful record. Countless thousands of people who formerly approached their meals with dread, now eat their fill of their favorite foods without fear of the after-effects.

Mr. Kramer says: "My EATONIC tablets are the solution of the age-old problem of indigestion and all forms of stomach misery.

"EATONIC neutralizes the acids, that form the painful gases, 'sweetens' the stomach, and gives the gastric juice a chance to do its work as it should.

"To promote appetite and aid digestion, take EATONIC tablets—one or two after each meal. They are perfectly harmless. Eat them just like candy.

"For distress after eating; sour, 'gassy,' acid stomach, vertigo, nausea and belching, and that wretched, puffed-up, 'lumpy' feeling, after over-eating; there is nothing to compare with EATONIC Tablets."

All druggists sell EATONIC—50c for a large box. Watch out for imitations. The genuine bears the name EATONIC on each tablet—guaranteed to do all that is claimed; or if your druggist don't carry EATONIC—send to Eatonic Remedy Co., Chicago, Ill.

WEEDS SOMETIMES USEFUL IN ADDING ORGANIC MATTER AND PREVENT EROSION

Land Turned Out to "Rest" and Grown Up to Sassafras Bushes and Weeds.

(Prepared by the United States Department of Agriculture.)

Weeds are not always useless. Sometimes they are the principal means by which organic matter is restored to the soil, and, generally speaking, a soil is productive in proportion to the quantity of organic matter it contains. In many parts of this country it is customary to farm land until the crops are too poor to be profitable and then "turn it out to rest." This merely means that weeds are permitted to grow on it for several years; after that the soil will be more productive.

Weeds are also useful at times in preventing soil erosion, especially during the winter months. Weeds are further useful in collecting and holding the nitrates and other soluble salts during periods when crops are not being grown, thus preventing these valuable nutrients from being washed out of the soil. Ordinarily, however, all these benefits may be realized through proper rotations, in which case it is a serious mistake to let weeds grow.

HELP PRODUCE FOOD TO FEED SOLDIERS

Town Man Qualified for Farm Work Should Offer Services.

Many Communities Throughout United States Must Depend on Volunteers for Heavy Seasonal Needs—It Is War Job.

(Prepared by the United States Department of Agriculture.)

If you are a town man qualified for farm work in your county during the rush periods of planting, cultivation and harvest, and if you hesitate to offer for such service because it will be inconvenient and difficult and because you will earn less money for that short period of farm work than you would have earned in town during the same time—if this is the case you have failed to grasp either the seriousness of the present peril to civilization or the importance of the personal responsibility resting upon you, and every individual.

If you are a farmer in need of extra help, without which your food production will be diminished, and if you are reluctant to use emergency town volunteers you also have not seen the peril—have not heard the call that has inspired other men to give their lives.

The higher wage inducements of city industries and plants producing war materials have drawn many workers from the farms during the last year or two. As a consequence most communities all over the United States must depend upon local emergency supplies of farm labor for their heavy seasonal needs. Plans have already been put into effect in a great many sections whereby sufficient town volunteers have been secured to supply the need of the adjacent farm territory during the busy periods.

Of course this is hard work. Of course, in most cases, it means some financial sacrifice upon the part of the town man, and some annoyance to the farmer who would prefer permanent, skilled help. But you are called to that service! It is just a situation that must be met. Suppose soldiers hesitated to do things that are hard and difficult and annoying! Suppose men wouldn't go into the army unless they profited financially! If American men had taken that attitude Germany would already have crushed the defenders of civilization, and you would now be concerned about the safety of your wife and children—not your convenience and your money! The last two would certainly be taken from you with a Hun victory—and the Hun will win if soldiers ever hesitate, as some civilians have hesitated to do the difficult, the unpleasant, the financially unprofitable thing!

It is your war job to work on farms in your county, when and where your services are needed to produce and harvest food crops, war-winning crops. It is the farmer's war job to use such help to the utmost advantage. Our soldiers are gloriously doing their war job over there. The most you can do is infinitely small, by comparison with what they do. Do farms in your county need help? Then think of the boys from your town, going over the top under shell fire today—and go to work to help feed them!

Best Soil For Soy Beans.
Any land that will grow corn will grow soy beans. It is often recommended that these two crops be grown and hogged down together.

LOCAL LIME SUPPLY USEFUL

Necessary Food Furnished for Plants and Is Great Aid in Speeding Up Many Crops.

(Prepared by the United States Department of Agriculture.)

While lime is not usually listed among the commercial fertilizers, it furnishes a necessary food for plants and when properly used is a great aid in speeding up the production of many crops. Its greatest value is for correcting acidity of the soil under which condition many plants will not thrive. It also improves the soil's physical condition and influences favorably the decomposition of organic matter. In some cases it may make available to some extent soluble forms of potash and other minerals. It is particularly valuable if there is a good supply of organic matter in the soil.

Spring is a good time to apply lime, particularly the hydrated form and specialists of the department of agriculture are urging that local limestone deposits be utilized in every possible way. This is already being done in many places but no doubt the practice could be widely extended. However, it involves, in the case of grinding, the purchase and delivery of grinding machinery, which may be difficult to accomplish, and in the case of local burning it means the purchase and delivery of fuel unless there is local fuel available. Wherever fuel, either wood or coal, is available, however, together with a local supply of limestone, every effort should be put forth to make use of this limestone in the present emergency.

ANIMAL-PROOF SHEEP FENCE

Department of Agriculture Gives Plan for Barrier to Keep Out Dogs and Coyotes.

(Prepared by the United States Department of Agriculture.)

A fence constructed in such a way as to bar dogs and coyotes from territory in which sheep are pasturing has been designed and put to use by the forest service of the United States department of agriculture. Specifications for the dog-proof fence follow:

Posts 7½ feet in length, set 2½ feet in the ground and 16 feet apart; a barbed wire stretched flat to the surface of the ground; 3 inches higher a 16-inch woven-wire fence having a 4-inch triangular mesh; 5 inches higher a barbed wire; 6 inches higher a second barbed wire; 7 inches above this a third barbed wire. Total height, 51 inches.

It is essential that the bottom barbed wire be stretched flat on the surface of the ground at all points. This is accomplished by grading the ground before the fence is built and by filling in the small holes afterwards.

BANKS HELP BUY TRACTORS

Notes Given for Farm Machines Will Be Treated Same as Other Agricultural Paper.

(Prepared by the United States Department of Agriculture.)

Federal reserve banks are to rediscount notes secured by farm tractors. Instructions have been issued by the federal reserve board to all federal reserve banks authorizing them to rediscount tractor paper presented by any member bank, provided it has maturity not exceeding six months and the tractors are purchased for agricultural purposes.

This action of the federal reserve board means that notes given for farm tractors will be treated in the same manner as other agricultural paper, thus making it easier for farmers to obtain tractors where needed.

Libby's Tempting veal loaf

WHAT is more tempting for a summer luncheon than Libby's savory Veal Loaf! Prettily garnished it makes a dainty yet substantial dish—and one all ready to put on the table!

Order Libby's Veal Loaf today. You will want it always on your shelves—for quick lunches—for unexpected guests.

Libby, McNeill & Libby, Chicago

No Virtue in Numbers. At the Opera. "What a powerful voice that tenor has!" "Probably more famous than the president's sixteen sheep," she cried. "Yes; I can't hear myself when he's singing."

The Farmer's Share

Live stock is marketed from farmer to consumer at a lower cost than almost any other farm product.

The United States Department of agriculture reported in 1916 that the farmer gets for his cattle "approximately two-thirds to three-fourths" of the final retail price paid by the consumer for the resulting beef.

Under normal conditions, the farmer's share of retail prices of various farm products is approximately as follows:

Butter	71 per cent
CATTLE	66⅓ to 75 per cent
Eggs	65 per cent
Potatoes	55 per cent
Poultry	45 per cent
Fruits	35 per cent

The difference between farmer's price and retail price represents the necessary expenses of packing, freight and wholesale and retail distribution.

Swift & Company not only performs the manufacturing operations of preparing cattle for market in its well-equipped packing plants, but it pays the freight on meat to all parts of the United States, operates 500 branch distributing houses, and in most cases even delivers to the retail butcher. All this is done at an expense of less than 2 cents per pound, and at a profit of only about ¼ of a cent per pound of beef.

Large volume of business and expert management, make possible this indispensable service to the live-stock raiser and to the consumer, and make possible the larger proportion of retail prices received by farmers.
