Flush the Kidneys at once when Bed hurts or Bladder bothers-Meat forms uric acid.

No man or woman who eats ment regu-larly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms price acid which elogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheuma-tism, headaches, liver trouble, nerwous-ness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kid-neys.

bladder disorders come from sluggish kid-neys. The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sedi-ment, årregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, som-bined with lithia and has been used for generations to finek clogged kidneys and generations to flush clogged kidneys and stimulate them to activity, also to neu-tralize the acids in urine so it no longer causes irritation, thus ending bladder dis-orders Jad

Salts is inexpensive and can not injure; makes a delightful effor-vescent lithis-water drink which all reg-ular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kid-uey complications.

street and Fifth avenue. "It was only just the other day that we had a block-ade that tied things up for half an hour. I noticed a young woman pounding something against the curb. Looked fumpy to me and I couldn't figure out what it was. People passing by started to run, looked again, and breaking a lot of mirrors on the side-

out of the crowd?"-From a New York Letter to the Pfttsburgh Dispatch.

The Hopi Indians of the Southwest have always been famous for their pot-

Hair that lozes its color and justre, or when it fades, turns gray, duil and lifeless, is caused by a lack of sulphur in the hair. Our grmadmother made up a mixture of Sage Tea and Sulphur to keep her joeks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hear which is so at-tractive, use only this old-time recips. Nowadays we get this famous mix-ture improved by the addition of other ingredients by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," which dark-ens the hair so naturally, so evenly, that nobody can possibly tell it has been applied. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears; but what delights the ladies with Wyeth's Sage and Sulphur Compound is that, be-sides beautifully darkening the hair after a few applications, it also brings back the gloss and lustre and gives it an appearance of abundance. Wyeth's Sage and Sulphur Com-pound is a delightful toilet requisite to impart color and a youthful ap-pearance to the hair, it is not in-bended for the cure, mitigation or pre-vention of disease.

stricted area of the ordinary loc tive boller. New thousands of locomotives use this superheated steam, and its use is increasing.

By heating steam 180 degrees Fahrenheft above the saturation tend-perature "hot steam" is produced. With this increase of temperature the steam is dried and the volume is increased. But the increase of volume is less important than the suppression of all condepsetion in the cylinders the superheat is sufficiently high. Hot steam being a bad conductor it also reduces loss by cooling in the cylinders from 25 to 80 per cent, according to type and structure of the engine.

Cave Has Natural Heat.

A naturally heafed cave has been discovered at Horse Butte, near Bend, Gre., which appavently draws its warmth from a subterraneau volcanic source. The discovery was made by C. A. Yarnell and H. D. Eide, local fuel dealers. The cave is located, near the top of the butte and first attracted attention when a wave of heat was felt issuing from the mouth. The cin der bottom and rock walls of the tunnel aré unbearably hot to the touch nomenon is a recent manifestation was indicated by the smoldering of grass and twigs near the opening. To test the natural oven Mr. Yarnell cooked a fight breakfast by introduc ing ray? articles of food into the aperture and closing the orifice for a few nents,

tery, in the manufacture of which (though unacquainted with the pot ter's wheel) they were skilled even inprehistoric times.

There is a considerable market for ompany
