Divisions of Earth's Interior.

The my intention to renounce forever all allegiance and adelity to any foreign prince, potentate, state or sov relgaty, and particularly to King Bogo of Zululand, South Africa."

If you should ever happen to meet, as you go to and fro in the earth and walk up and down in it, a very dark gentleman, tall, short, fat, lean-any kind of a very dark gentlemay-with large round holes in the upper parts of his ears, try to remember what I that a plain, ordinary American citizen is expected to do when he unexpectedly meets up with one of the royal family of Zululand, observes the

ew York Sun. For those holes in the upper part of the ears-the upper part, mind youare one of the royal prerogatives in King Bogo's realm. The dark-meated of the plain plug variety are er portions of their wars.

But there is one member of the royal family of Zululand who will take ne mere pride in having large round holes in his hearing apparatus. name is Musa, or "Umsa" Bryam, and his declaration, which stands at the head of this item, was made the other day before Naturalization Clerk J. J Kingston of Oakland, Cal.

Musa Bryam says he is a son of Fundy Bryam, once a king of the Zulus, and a nephew of King Bogo. the present ruler. He left Zanzibar South Africa, in 1894, when he was afteen years old, and came to Oakland where he became a prize fighter and is now working as a bootblack He is married and proudly boasts that, Louisa, was born in Texas. King Bogo of Zululand has lost a and Uncle Sam has gained

To Give Timber "a Shot."

The best method of applying pre-servatives to timber is by the pressure King George in respect of their ancient process which is used by practically China and the Chinese. all large commercial comp American Forestry Magazine of China, once had occasion to hand Washington. By this means the offor mineral sait is forced deeply into the tissues of the wood, thus giving a inland village, and Straight that night thoroughness and permanence otherwise attainable. There are vi

Much Timber Decay.

It is estimated that eight billiand England in America the feet of untreated structural timbers decay every year, says the American Forestry Association of Washington.
If that whole amount were to be treat is to say. It would render unnecessary. the annual deforestation of some four bundred thousand acres of land. There could be no truer or more effectly builder who, by the use his house tives, lengthens the life or barn, performs an effective service

to the cause of forestry.

From the evidence available, R. D. Oldham traces three divisions in the earth's interior. The solid outer crust, with a thickness of ½ to 1 per cent of the radius (or 20 to 40 miles), has high permanent rigidity, but from unknown causes has been subject to deformations, with displacements of as much as ten miles vertically and 100 horizontally. The next section, about half the radius in thickness, has high rigidity for such streams as tidal action, with low rigidity for long-continued stress. The central nucleus has

waves

Harnessing Volcano. Tentative plans for the harnessing of Hawall's mighty volcano, Kllauea, have been prepared by a committee of manu facturers on the island, according to news reports The volcano continuous ly is giving off vast quantities of hear ranging as high as 2,000 degrees Fahrenheit. It is planned to harness the heat and develop it into electricity for the antimited development of indus tries on the Island. It is proposed to make the heat available by boring made in gete ferritory, to depths where the be * is constant and high enoug for the development of a continuous steam pressure.

MEANT TO HOLD PRISONERS

Bulyer Make Charges Getting Away From Him.

"The late Willard Straight," said a Cornell professor, "often used to tell a story which typified, he said,

to a Chinese policeman nine Chinese delinquents. This happened in a small walked round to the policeman's quaters to see how his prisoners were get

nd saw that the men were not really holding hands, but were handcuffed

wrist to wrist. "The policeman then came out and stirred them up with a long pole, whereupon they danced a little faster of detaining his prisoners.

"But why said Straight, 'do you keep them dancing all the time?' "That, said the policeman, 'Is to prevent them from climbing up the flagstaff and escaping.

"Straight tried to explain that nine men, handcuild together, could men, handcuild together, could scarcely climb up a flagstaff simul-

farieously but the policeman thought it was best to be on the safe side, and his nine prisoners danced their weary dance round the flagstaff all night long."

Buying and Selling Without Money. The difficulties in conducting trade without money are illustrated in the following, reported by the United States Trades commission at Riga: According to current news from So viet Russia, the Council of the People's Commissariat has established arbitrary exchange values for certain com modities, with one pood (36 pounds) of rye grains taken as the basis. It is stated that this move has been made necessary by the reintroduction of

freedom in private trade. change-values, as established in June. it appears that one pound of rye grain is fixed as the equivalent of 12 poods of salt, 25 poods of petroleum, 12 packages of matches, 8 metal palls, 4 iron spades or 6 arshins (1 arshin equals 28-inches) of calico.

Coal From Spitzbergen A few months ago the first Holland contingent of engineers and coal miners embarked for Spitzbergen to cently acquired by a group of well known Holland commercial men. The first cargo of Spitzbergen coal arrived at Rotterdam, August 11, direct from the mines of the Netherlands-Splizbergen company. Notwithstanding the high freight rates, it has been shown that Spitzbergen coal can be laid down in Holland at a price lower than that paid for English or German coal Ensy access to the coal beds and economical working of the mines make these cheaper deliveries to Holland Enormous amounts of coal are available.

GRAPEFRUIT IS SQUIRTLESS

Tangelo is Cross Between Orange Tangerine and Grapefruit-Delicious When Ripe.

Squirtless grapefruit is a noveity of the department, state in a builetia that these resemble round oranges, ore than either of their parents.

There are two varieties, the Samp son and the Thornton. The former has disappointed those who tasted it because they mistook its ripe appearance and ate it before it was mature. director stations inree, rounds and ate it before it was mature, cameras to take the same scene. He is delicious when fully ripe, with cameras to take the same scene. It is delicious when fully ripe, with a rather acid, sprightly flavored, are matic, soft and julcy deep orange colored pulp."

The Thornton has "very pale orange colored juice and sprightly flavored pulp. It has little acidity and resembles a tender, good-flavored orange more than a grapefruit of tangerine.

It may be eaten out of hand, ifke a tangerine, but is doubtless better when halved and eaten like grapefruit. It requires no sugar, and the pulp is so without cutting the segments; moreover, there is little or no tendency for the juice to squirt when the spoon is inserted in the segment."

EAGLE SWIFTEST OF BIRDS

"King of Sky" Had No Trouble Keeping Pace With Airplane in Novel Contest.

The eagle, according to aeronauts remains not merely the king of birds, but in flying quality the swiftest of all birds. A French "flyer" from the French payal station at Salonica in February 1916, had a match with an eagle near Mount Olympus. The eagle competed of his free will says the New York Herald.

"I was followed by the eagle. writes Commander Larrowy, "at a tance of about 100 feet. Our machine was making her full measure 60 nautical miles an hour. In comparison with us the bird seemed so perfectly at a standstill that I was able to phosecond, as the sky was cloudy, and

"For two minutes the bird practically did not move its wings, and seemed to glide, except every ten or slight and careless sort of rowing motion as if to keep Mr. *
"When the bird abandoned all

thoush of attacking ifs strange rival it weet wall seed shoul and covering touch more than sixty miles an hour.

Stingy. Mayor Hylan at a dinner was de

ending New Work.
"New York," he said, "Is a big taryet so she's easy to hit, and everybody

takes a shy at her. A Chicago man canfe home one eve ning and said to his wife:

"That, new butler of ours-he's ne butter. He's a crook. He's wanted in New York."

"My goodness," said the man's wife, "haven't they got enough crooks in New York? What on earth do they want any more for?"

Making a Motion Picture.

Usually 150,000 to 200,000 feet are run through the cameras to get a sixreel, or 6,000 foot motion picture. The has oug camera close beside the strug-gling villain and hero; another grind ing from an elevation, still another this angle, one more at that angle veloped, parts of each enter into the composition of the completed reel .-Indianapolis News.
