Plenty of Measles Cases Yet in Town

MEASLES EPIDEMIC IS STILL RAGING IN WILLAMSTON ON A BIG SCALE

The epidemic of measles which caused the closing of the local schools last week is still raging, but now it looks as if all the children of the whole town who had not had it before have had it this time and are now on the road to recovery.

The children have been very sick but very few dangerously ill, and the bad weather that we are now having necessitates their staying in closely that they may not take cold as it is very dangerous to do so.

The schools will re-open next Tuesday unless there are further complications.

KAISER NOT HAPPY WITH SECOND WIFE

PRINCESS HERMINE HAS MOVED TO ANOTHER PART OF DOORN CASTLE

LONDON, Feb. 2.—The correspondent of the Yorkshire Evening News writing to his paper from Doorn, says:

In spite of the elaborate efforts to hide the truth I have discovered that the second marriage of the former German emperor has been a complete failure and that at the present moment he is living in one part of the castle while his wife and her children are in another. I am told that a very few weeks sufficed to bring about the breakdown.

Those who are near the ex-kaiser have been struck by the grave alteration not only in his mood but in his character. He is said to have been affected very unfortunately by the operation for gland transference he underwent before his second marriage. His own children have not forgiven him for the second marriage and the step-children avoid him.

His means are reduced and his private expenditure is strictly limited. He is living today under most unhappy family conditions. He commands neither service, affection nor companionship, and the breakdown in his domestic arrangements is painfully apparent to the very few who visit him.
