TUESDAY, APRIL 17, 1923.

HELLO!

With a clamp on her head like a cage for her hair;
She sits all day in a stiff little chair,
And she answers the calls that come over the wire
From people of patience and people of ire,
And, "number," she queries of noble or churl;
A wonderful voice has the Telephone Girl.

She has to be pleasant, and hustling and keen
With a temper unruffled, serene.
There are forty-five things she must remember at once,
Or some one, impatient may call her a dunce,
Since it seems a general custom to hurl
The blame for your grouch on the Telephone Girl.

It's wearisome work on the nerve and the brain,
Continual hurry, continual strain,
And, of course, she gets tired, as other folks do,
And needs to be thoughtfully treated by you,
So think of her doing her best 'mid the whirl,
And try to be white to the Telephone Girl.

—M. Murrin.

AMERICAN CITY GIVES GOOD DESCRIPTION OF COOPERATIVE CREAMERY

Tarboro, a typical North Carolina town, has a municipally owned pasteurizing plant. In view of the fact in Gaston county of a cooperative creamery, a description of the Tarboro plant as given in the American City, will be of interest:

"For three and one half years this small city has had a municipal plant which handles all the milk used in town, about 1,000 quarts daily. No milk, cream or skimmed milk can be sold in town unless pasteurized. This seems like a temporary municipal monopoly, but the decrease in the death rate in babies and the increase in general health since the installation of the plant have justified it."

The plant itself was installed by Dr. K. E. Miller of the State Board of Health service. It handles about \$30,000 worth of milk yearly, pays expenses, and furnishes the highest quality of milk, delivered at the home of the people, for 18 cents a quart.

The daily report of the city manager shows in detail information that may be desired for the office of the city clerk and treasurer, including the figures of profit and loss each day. Milk tickets are sold to the public for two reasons: first, milk has to be paid for in cash; and, second, the milk tickets are destroyed daily at the office of the city clerk; so that no tickets can be used a second time, thereby eliminating the chance of transmitting germs.

In the pasteurization plant the recording thermometer gives an accurate record of the treatment of the milk, and, exhibited at the office of the city clerk each day, assures the public that the safeguard of pasteurization for which they are paying has actually been applied to the milk they drink.

The plant occupies a steel building costing \$5,500, with concrete floor, and is painted on the inside with white enamel. It is fitted with electric fans and is completely fly proof. The manager and his assistants are required to wear white suits. The milk after being bottled is placed in the pasteurizer, carried to 150 degrees Fahrenheit at the rate of 5 degrees per minute, until the 150 degrees is reached. There it is held for 5 minutes and then brought down to 140 degrees and held there for 35 minutes; and is then cooled at the rate of 5 degrees per minute down to 60 degrees.—Gastonia Gazette.

GREATEST THING FOR AMERICAN YOUTH OF TODAY

By T. B. LANKFORD
If I were asked what I consider the best way in which an American youth, who comes in the age-limits, could do for his summer vacation I would say, from experience, a course in the Citizen's Military Training camps which are being conducted all over the country.
Last summer I was out of a job for several weeks and was looking around for something to do. I had

heard of this new idea the United States army was putting over and investigated, and the first of July found me with 3,000 other young Americans signed up for what was to be offered at Camp McClellan, Ala. I didn't know whether a bunch of hard-boiled army officers would get me down there from my North Carolina home and work me to death in the hot summer day or let me loaf and do as I pleased. At any rate I went, and now I consider the experience I had there was one of the finest of my life.

I was rather anxious to see what this camp would resemble. I had volunteered in the Winston-Salem, N. C. home guard during a race riot at one time and I wanted to see if my new adventure would be anything like the old one, or if it would be like the R. O. T. C., S. A. T. C., or what. To my surprise I found it altogether different from either.

On arriving at Camp McClellan I learned that the training camp group was made up of high school graduates, and college men for the most part, wanting to get some good physical training without cost. It was a nice bunch of fellows and, generally speaking, we all liked each other from the start. At first we were a little confused, home sick and almost ready to wish we hadn't come, but after being assigned to regular companies and knowing each other better, we began to find satisfaction in what we had decided to do, and our actual training really began the first day, although we were not aware of it. We were graduated according to height and placed in squads, marched to and from delightful meals.

On the second day we were taken to drill ground number 2, where we watched the regulars go through the things we were to try to learn to do. We were kept busy from the sun and at the end of the week it would have been hard for anyone to recognize us as the boys who first hit camp.

Then came talk of the rifle range and many of the boys dreaded this because we had heard how the nine round rifles kicked and cut up a not handled properly. But we had excellent instructors and most of us came through the rifle work without any trouble. It seemed rather remarkable that no one got hurt, but if every man's noose had been there to give warnings, things could not have been done more carefully than under the direction of those lieutenants, captains, majors, and even the old regulars themselves.

Makes Cleaning-Time Easy

Old Spring-cleaning backaches are out of style. A little RED SEAL Lye does the work better and a lot easier. The clever woman finds many ways of making it work for her.

Let us suggest a few of the many uses to you.

Write for booklet. Full directions in each can. Be sure and buy only the genuine RED SEAL Lye.

A NEW FILLING STATION
The popularity of "Texaco" gas and gasoline has demanded another filling station in Williamston. You can stop at my door on Main street and be served with the "real stuff" that gets extra speed, and service to your car. At the same time, you can be given free air and water, not to mention polite service. You can get it at Dunn's every day. W. E. Dunn. 4-16-23
