NAVY'S PANCAKE HAT TO GO Extensive Changes Also May Be Made In Other Details of the Sailor's Uniform. Although the details have not as yet been worked out or in fact agreed to, in all probability there will be some important changes in the uniform for the enlisted men of the navy. It is understood that Secretary Denby, as well as the higher ranking officers in the Navy department, has taken an interest in the subject. There is a general agreement among the authorities that there should be some changes in the regulations as well as in the cut of the uniform of the navy enlisted personnel. A change in the petty officers' first-class uniform has now been practically approved. As for the bluejackets, there is a diversity of opinion even among those who are urging a change. There is considerable support for a proposition to give the bluejacket a different and dressier uniform to be worn while on duty or on leave ashore. A uniform for the bluejackets with a cap like a commissary steward with long trousers and a double-breasted coat is being well received. This uniform would have gun-metal buttons and would be worn with a white shirt. The cut of the trousers would approach that of the civilian. Every recommendation or letter that has been received in the Navy department is adverse to the present flat hat for bluejackets. There is no doubt that it will go and the enlisted men will be given a new cap—Army and Navy Journal. Less Noise; More Efficiency. Nerve-racking noises should be eliminated through scientific study and development of new appliances, as a means to keep down the high cost of living, President Charles Russ Richards of Lehigh university said. "Scientists should study means to eliminate noises, especially in big industrial plants, and should design apparatus for the purpose," Doctor Richards said. "Workmen's efficiency cannot but be impaired by the increase in noises to which they are subjected with the increasing complexity of civilization. Improved production is the only means whereby costs can be reduced in these days of high-priced raw materials and high-priced labor, and certainly more efficient workers mean improved production."—Science Service. Or Go Insane. "Sam," asked his good wife, "when you come home tonight will you bring a dozen eggs?" "Yes, my dear. What are eggs selling at—80 cents a dozen?" "Oh, no, they haven't been that high for a long time. They are now selling around 35 cents. I remember when they sold for 12 cents a dozen. Wouldn't you like to see them at that price again?" "Well," replied her husband, "not too suddenly." "What on earth do you mean?" "It would be dangerous. If any dealer today put eggs on sale at 12 cents a dozen, many worthy people might drop dead."

"If that bus ever gets running our jobs are ruined!"

J. are visiting Mrs. George Whitley for some time. Mr. and Mrs. T. R. Hodges visited Mr. and Mrs. Arthur White this week.

cent a pound on North Carolina's total crop of cotton means over two million dollars to this state while a premium of only a cent a pound means over four million dollars for the cotton growers of the state over and above market price. Mr. Blalock was discussing the importance of using standardized seed, carefully selected variety and suite to the climate and soil of the state. After discussing the importance of breeding in stock and seed, Mr. Blalock gave it as his personal experience as well as his observation, that the cotton growers should standardize staple cotton and standardize on varieties of a uniform staple of a heavy bodied type. He suggested the Mexican Big-Boil as a seed which would give general satisfaction. Mr. Blalock told of having asked some English cotton mill men their opinion of the "Cotton Standard Act" and they replied that they were more interested in a real good variety and thought it would be better for the Carolinas to adopt particular variety, name it and make it famous. They would always prefer a variety with a uniform staple and of a heavy bodied type. In his address Mr. Blalock told of

conservations with other large manufacturers and how they had advised that North Carolina farmers should break away from staple cotton and standardize on Cleveland or Mexican Big-Boil.
