

THIS THAT AND THE OTHER—MOSTLY THAT (By The Wayside)

Fair Warning! If you haven't time to read any of this column rest assured that you have missed nothing.

Mr. Collins S. Peel, the Texaco Man, made a shopping tour to Parmele this week. How he escaped the danger of all four east, west, south and north bound trains and escaped safely with a pair of headlight overalls we don't know.

There is something to the saying "The cows may come, and the calves may follow, but the old bull will never be tamed."

FORD MOTOR COMPANY PUTS NEW PRODUCT ON THE MARKET

The Ford Motor Company enters the new year with a new product, an all steel combination truck body and cab mounted on the standard Ford One ton chassis to be sold as a complete unit.

The new body is of the open express type, so constructed that it may be readily converted into other body combinations by using stakes, side boards, canopy, top, screen sides, etc.

"In fact" says the Ford statement "the purpose in producing the new body was to place a low cost general utility truck, meeting both agricultural and commercial requirements of the disposal of truck users."

The body is built of steel to withstand the most severe usage and presents a new development in construction. The steel sills are reinforced with wood in order to lessen vibration and road shocks, thus making for more durability and longer life.

The loading space is seven feet two inches in length by four feet in width and of convenient and practical depth. The end gate is strongly braced and secured by heavy chains which hold it in position when lowered.

The cab, also of steel construction is extra roomy. The seat is of artificial leather, well-cushioned on four inch springs. Protection from the weather is afforded by close fitting door curtains, mounted on uprights and opening and closing with the door. An oblong window in the back of the cab gives ample facilities for rear vision, adding to the safety as well as the convenience of the driver.

The new truck which is already on display in many Ford dealers show rooms throughout the country, sells

complete with steel cab and body for \$490.00 F. O. B. Detroit, being priced in accordance with the standard Ford policy.

In addition to the saving offered truck users in this body, is the convenience of now being able to buy the Ford Ten Truck complete and ready to put into service.

THOSE NIGHTS IN JUNE

Those nights in June, how oft I have I been haunted By memories of the mingling moonlight's beam, And rains of song by which my soul enchanted Poured out a part in the inspired theme.

LAW FIRM MOVES TO NEW OFFICE

The law firm, Lamb and Coburn, formed recently is moving into new office this week. The two partners have remodeled the store where A. O. Brown kept a barber shop and now have an up-to-date office there.

Mr. Lamb was graduated from the University law school several years ago, while Mr. Coburn was graduated a few years later from the same school.

Why Are Drugs Standardized? They are standardized in order to bring about uniform therapeutic efficiency to the patient whenever required. This efficiency is most needed in the sick room—not merely in the laboratory. What is true of drugs must be true of foods. Purity and efficiency in the can is only part of the problem—purity and efficiency in the kitchen is the true test. The law requires that baking powder contain 12% leavening gas at the time of sale to the consumer. This measure insures uniform leavening efficiency and protects the health of the public. In order to comply with this fixed standard for baking powder, manufacturers must produce and pack their product so as to avoid the deterioration which may result from absorption of atmospheric moisture. Baking Powder manufacturers to avoid violation of the law, also spend thousands of dollars yearly in testing grocers' stocks and removing "spent" goods from his shelves, in spite of the fact that every possible precaution had previously been taken against deterioration. With the exception of Texas, the pure food laws are not applied to baking powder mixed with flour at the mill and sold in bags as "Self Rising Flour." There is no penalty on the manufacturers if this fails to "self rise"—the consumer is the "goat"—he is the one that pays the penalty through indigestion and ill health that comes from eating bakings that are not properly raised. The standardization of baking powder is a protection to both the consumer and the manufacturer—who welcomes such laws and co-operates in every way possible. But! Not so with the self rising flour manufacturer—he resents such laws and fights such legislation. Why? Because a standardization of self rising flour would require moisture-proof containers instead of cheap sacks—because low grade "cleans" could no longer be sold as "fancy patent flour." It would also mean he must maintain expert chemical control such as is now maintained by baking powder manufacturers. Calumet Baking Powder contains only such ingredients as have been officially approved by the U.S. Food Authorities. Packed in tin—keeps the strength in

Ford \$490 ONE TON TRUCK. A complete Ford Truck with all-steel body and cab CHASSIS ONLY \$378.00 Price F. O. B. Detroit. The new Ford all-steel body and weather-proof cab on the Ford chassis makes world's lowest priced complete one-ton truck. A New Ford Steel Truck Body. The Ford Motor Company announces the production of a new all-steel body and steel weather-proof cab, mounted on the famous Ford one-ton-worm-drive chassis, forming a complete haulage unit at the remarkably low price of \$490. Steel flare boards and end gate with sockets permit the use of the weather-proof cab in making the body readily adaptable for general use. Screen sides and end doors may easily be installed. This new body, built of heavy sheet steel strongly reinforced and riveted, is designed to stand up under the most severe usage. Loading space is four feet by seven feet two inches. The weather-proof cab is fitted with removable, door-opening curtains. Authorized Ford Dealers. Ford CARS - TRUCKS - TRACTORS
